an urgent study on how punitive immigration policies undermine the health of latinx immigrants of the approximately 20 million noncitizens currently living in the united states nearly half are undocumented which means they are excluded from many public benefits including health care coverage additionally many authorized immigrants are barred from certain public benefits including health benefits for their first five years in the united states these exclusions often lead many immigrants particularly those who are latinx to avoid seeking health care out of fear of deportation detention and other immigration enforcement consequences medical legal violence tells the stories of some of these immigrants and how anti immigrant politics in the united states increasingly undermine health care for latinx noncitizens in ways that deepen health inequalities while upholding economic exploitation and white supremacy meredith van natta provides a first hand account of how such immigrants made life and death decisions with their doctors and other clinic workers before and after the 2016 election drawing from rich ethnographic observations and in depth interviews in three states during the trump presidency van natta demonstrates how anti immigrant laws are changing the way latinx immigrants and their doctors weigh illness and injury against patients personal and family

security the book also evaluates the role of safety net health care workers who have helped noncitizen patients navigate this unstable political landscape despite perceiving a rise in anti immigrant surveillance in the health care spaces where they work as anti immigrant rhetoric intensifies medical legal violence sheds light on the real consequences of anti immigrant laws on the health of latinx noncitizens and how these laws create a predictable humanitarian disaster in immigrant communities throughout the country and beyond its borders van natta asks how things might be different if we begin to learn from this history rather than continuously repeat it

modern engineering often deals with customized design that requires easy low cost and rapid fabrication rapid prototyping rp is a popular technology that enables quick and easy fabrication of customized forms objects directly from computer aided design cad model the needs for quick product development decreased time to market and highly customized and low quantity parts are driving the demand for rp technology today rp technology also known as solid freeform fabrication sff or desktop manufacturing dm or layer manufacturing lm is regarded as an efficient tool to bring the product concept into the product realization rapidly though all the rp technologies are additive they are still different from each other in the way of building layers and or nature of building materials this book delivers up to date information about rp technology focusing on the overview of the principles functional requirements design constraints etc of specific technology

perhaps the most difficult thing that human beings are called upon collectively to do is to run a government why do so many fail there are 196 countries in the world about 150 of them significant at least 105 of them briefly summarized here are in deep trouble deep trouble is defined by wars insurrections active internal conflict serious maldistribution of wealth deep and widespread poverty rampant corruption serious lack of social services and public infrastructure and an excess of plain old bumbling government incompetence created and exacerbated by the governments themselves out of greed viciousness and an insatiable lust for power this is the tragic record of government from the top down it is therefore vital to strengthen the bottom up elements of national activity and at the same time people must try to point these stronger elements toward resistance to top down authority the new and growing hope is that decent people and organizations all over the world will increasingly rise up in their own defense and bring a new level of moderation and spirit of aid and service from the bottom up to these failing states that are their homes
