Community Innovations in Sustainable Land Management 2016-06-23 it is increasingly recognized that land can be managed most sustainably through involving local communities this book highlights the potential of a new methodology of uncovering and stimulating community initiatives in sustainable land management in africa analyses of four contrasting african countries ghana morocco south africa and uganda show that as communities directly face the challenges of land degradation they are likely to develop initiatives themselves in terms of sustainable land management these initiatives or innovations may be more appropriate and sustainable than those emanating from research stations located far from the communities the book describes the rationale of the approach used the set of steps followed how the project managed to engage the communities to understand the importance of the activities they were undertaking and how they were stimulated to improve and extend their initiatives and innovativeness examples covered include soil fertility community forestry afforestation water invasive species and grazing land management central to the book is the way communities and scientists interacted between the four countries and learnt from each other the book also shows how the initiatives were outscaled locally

Strengthening of Concrete Structures 2023-01-01 this book presents unified design approach for strengthening concrete members with different techniques such as concrete steel and frp jacketing preference between the various techniques is explained in light of strengthening limits procedures and application for each case examples for evaluation of existing structures and design equations for strengthening concrete elements are presented based on the aci design codes and standards numerical examples are also given

for different strengthening techniques with illustrations for the construction methodology and detailing for each case several case studies are explained starting from problem diagnosis structure analysis proposal for different strengthening methodologies and implementation procedure for the selected scheme the case studies include structures subjected to gravity loads lateral loads elevated temperature and differential settlement of the foundations it addresses design and construction errors environmental impact and soil movement the case studies include conventional reinforced concrete post tensioned and precast concrete members

Design of Reinforced Concrete 2015-09-15 design of reinforced concrete 10th edition by jack mccormac and russell brown introduces the fundamentals of reinforced concrete design in a clear and comprehensive manner and grounded in the basic principles of mechanics of solids students build on their understanding of basic mechanics to learn new concepts such as compressive stress and strain in concrete while applying current aci code

Advancing banana and plantain R & D in Asia and the Pacific Vol. 12 2014-08-01 each year thousands of lesbian gay bisexual transgender and intersex lgbti asylum seekers apply for asylum in eu member states this book considers the position of lgbti asylum seekers in european asylum law developing an encompassing approach to the topic the book identifies and analyzes the main legal issues arising in relation to lgbti people seeking asylum including the underestimation of the relevance of criminalization of sexual orientation as well as the large scale violence against trans people in countries of origin by some european states the requirement to seek state protection against violence even when they originate from countries where sexual orientation or gender identity is criminalized or

where the authorities are homophobic the particular hurdles faced during credibility assessment on account of persisting stereotypes and queer families and refugee law the book gives a state of the art overview of law in europe both at the level of european legislation and at the level of member state practice while being largely focused on europe the book also takes into account asylum decisions from australia new zealand canada and the united states and is of relevance internationally offering analysis of issues which are not specific to particular legal systems

quality of life inevitably increases with age recent research and ongoing studies from a variety of perspectives are presented from several nations the book clarifies the known and hypothetical factors favoring healthy longevity from genes to social integration additionally chapters explore gender differences in age trajectories and changes over time special attention is given to the social and cognitive dimensions of healthy longevity key features disseminates new scholarly research about a rapidly growing segment of the populationóthe oldest old offers multidisciplinary and international perspectives about the factors that promote healthy survival and improve quality of life addresses the social and cognitive dimensions of healthy longevity provides important information regarding health care costs for this population includes the research of seasoned and emerging scholars

Fleeing Homophobia 2013-02-20 this books explores how an analysis of past forest governance patterns from the global through to the local level can help us to build institutions which more effectively deal with forests within the climate change regime the book assesses the options under redd to reduce emissions from deforestation in developing countries in the context of other forest policies based on an assessment of existing multi level institutional forestry arrangements the book questions how policy frameworks can be better designed in order to effectively and equitably govern the challenges of deforestation and land degradation under the global climate change regime

Annual Review of Gerontology and Geriatrics, Volume 33, 2013 2013 increasing energy efficiency is important because it offers the prospect of partly solving our climate change and energy security problems without pain this book sheds further light on the issue focusing on energy extensive economic activities which by sheer volume collectively

challenges that emerge for local economies when faced with the new globalization trends that characterize today's world economy in this instance globalization is interpreted as a process of internationalization of production and markets which can take various forms such as increasing international trade or increasing foreign direct investments all of which give rise to the growing integration and interdependency of European economies with regard to the other main world economies the expert contributors use a fresh perspective in their analysis of globalization trends emphasizing recent changes and providing an up to date picture of current developments in both foreign investments and the consequent migration of human capital qualitative rather than quantitative trends in human capital and financial capital flows are taken into account with a particular focus on their impacts on regional growth perspectives highlighting the European economy's strengths and weaknesses in facing the challenges of the new globalization trends this book will provide a stimulating read for a wide ranging audience encompassing scholars of regional science regional economics economic and regional geography international economics and international business

Compendium der vergleichenden Grammatik der indogermanischen Sprachen Kurzer Abriss einer Laut- und Formenlehre der indogermanischen Ursprache, des Altindischen, Altarischen, Altgriechischen, Altitalischen, Altkeltischen, Altslawischen, Litauischen und Altdeutschen 1871 a broader view of relativity shows that there is still new life in old physics the book examines the historical context and theoretical underpinnings of Einstein's theory of special relativity and describes broad relativity a generalized theory of coordinate transformations between inertial reference frames that includes Einstein's special relativity

as a special case it shows how the principle of relativity is compatible with multiple concepts of physical time and these different procedures for clock synchronization can be useful for thinking about different physical problems including many body systems and the development of a lorentz invariant thermodynamics broad relativity also provides new answers to old questions such as the necessity of postulating the constancy of the speed of light and the viability of reichenbach s general concept of time the book also draws on the idea of limiting four dimensional symmetry to describe coordinate transformations and the physics of particles and fields in non inertial frames particularly those with constant linear accelerations this new edition expands the discussion on the role that human conventions and unit systems have played in the historical development of relativity theories and includes new results on the implications of broad relativity for clarifying the status of constants that are truly fundamental and inherent properties of our universe contents special relativity is not incorrect space time and inertial frames the novel creation of the young einstein experimental tests group properties common relativity and quantum mechanics extended relativity dynamics of classical and quantum particles group and lie algebra properties of accelerated transformation of spacetime graphic representations of the geometry of spacetime in accelerated frames two rocketships with constant linear acceleration on a gauge theory of gravity with translation gauge symmetry in inertial and non inertial frames appendices technical aspects of extended relativity coordinate transformations for rotating frames and other papers key features includes five new chapters a complete and comprehensive description of broad relativity which generalizes einstein s original theory of special relativity to new physical time systems and a limited

class of non inertial frames brings a fresh viewpoint with new physical implications and predictions to old physics gives an updated discussion on fundamental physical constants and unit systems and their influence on the development of relativity theories readership researchers in the field of relativity theory and advanced undergraduate students as a supplementary text
