 japanese edition of the best selling book 50 things to see with a small telescope people love this book 50 things to see with a small telescope highlights the must see objects observed at stargazing events all over the northern hemisphere people of

all ages frequently ask how did you find that so quickly well this book will explain just that the planets in our solar system the international space station sunspots birds nebula airplanes and comets are just some of the items that his book will help you find if you have been having difficulties enjoying your small telescope this book is for you there is something interesting about pretty much everything in outer space and it is exciting how many pop culture references are derived from things in the night sky viewing the stars referenced in star trek or talking about a character in harry potter named after a constellation is just another way to make stargazing that much more fun i am very excited to share my knowledge of astronomy and i am sure you will enjoy this book for years to come by working through the 50 items in this book you will achieve a well rounded understanding of amateur astronomy
