reporting standards are guidelines that describe how to communicate findings clearly in journal articles so that readers can access and understand the story of the research endeavor recognizing that reporting standards can aid authors in the process of writing and evaluating manuscripts and editors and reviewers in the process of evaluating those manuscripts the publications and communications pc board of the american psychological association apa invited two task forces of

researchers to develop standards for reporting quantitative and qualitative research in journal articles the quantitative journal article reporting standards working group developed standards for quantitative research and a separate book details those standards this book discusses the reporting standards it permits the space to expand on the ideas in those standards and to articulate the rationale behind each it articulates decisions one may need to make as an author as one decides how to present their work it also provides examples to illustrate a strong presentation style and these can serve as helpful models it provides the conceptual undergirding for the reporting decisions that authors make during the writing process the book considers the typical sections of a qualitative research paper x1b b7 x1b bthe introductory sections method results and discussion guidance is provided for how to best present qualitative research with rationales and illustrations the book presents reporting standards for qualitative meta analyses which are integrative analyses of findings from across primary qualitative research the book includes a discussion of objectivist and constructivist rhetorical styles in research reporting preface psycinfo database record c 2020 apa all rights reserved

How to Critique Journal Articles in the Social Sciences

2022-01-03

journal articles form the bedrock of social science but they can be unfamiliar and intimidating to students this brief introductory guide helps readers appreciate the rigor and pitfalls of research by comparing it to more ordinary ways of knowing each chapter focuses on a key aspect of articles demystifying step by step the complexities of social research harris encourages readers to avoid naivete accepting research findings as simple truth and cynicism dismissing research as hopelessly

flawed and instead adopt a critical perspective that appreciates the strengths and weaknesses of any piece of scholarship a new chapter on research design explores how scientists choose a broad approach to study a topic which impacts subsequent research decisions exercises throughout allow readers to practice the highlighted techniques in class discussion short assignments or a major writing project comprehensive yet succinct and accessible the second edition of how to critique journal articles in the social sciences equips students with the confidence to read and understand social research for use in their education careers and personal lives

Learning and Doing Policy Analysis in Education: Examining Diverse Approaches to Increasing Educational Access

2012-09-17

this book originated in a policy analysis class at michigan state university taught during 2010 using professor tatto s unique approach to teaching policy analysis the professor and students agreed to construct a class that represented a reflective and grounded experience in the policy analysis of a current and relevant issue with global ramifications we began exploring policies that were developed at the global level and that were implemented locally we investigated the surge of globally developed standards and regulations in an effort to improve education our goal was to learn cross nationally about policies that seek to reform curriculum and instruction under efficiency and global competitiveness arguments such as education for all efa and its usa cousin no child left behind nclb we knew our work would be bounded by the time available in a one semester class and by resource constraints we did exploratory inquiry supported by literature reviews reports on rigorous research studies and in one case an exploratory case study the policies we chose to explore such as efa and nclb offered us the opportunity to examine current reform tendencies that are intended to provide access to quality education for all children the preparation of teachers to support diverse populations the organization of schools to accommodate these children in response to vague policy mandates and power issues affecting the different constituencies and stakeholders the effects of these and other policies were difficult to track because research is scant and decisions are frequently made

based on ideology or political persuasion our purpose was to explore the critical issues that originated such policies and to search for documented evidence regarding policy implementation and effectiveness we investigated the factors that seemed to interfere with successful implementation from conceptual theoretical and methodological perspectives in this class we learned that there are not ready set frameworks for policy analysis but rather that these have to be constructed according to the issues that emerge as policies are conceptualized and implemented to fit local contexts and needs the book pays particular attention to the contexts of policy including the evolving conceptualization of global and local systems of governance knowledge regimes and policy spaces the book is designed for faculty and doctoral students in education who are interested in understanding diverse frameworks for policy analysis and for those in the general public who are interested in the policies we analyze here

Video Data Analysis

2022-03-17

video data is transforming the possibilities of social science research whether through mobile phone footage body worn cameras or public video surveillance we have access to an ever expanding pool of data on real life situations and interactions this book provides a flexible framework for working with video data and understanding what it says about social life with examples from a range of real video research projects the book showcases step by step how to analyse any kind of data including both found and generated videos it also includes a non technical discussion of computer vision and its opportunities for social science research with this book you will be able to complete each step of the research process fully and efficiently from data collection to management analysis and

interpretation use video data in an ethical and effective way to maximise its impact utilise contemporary technology and accessible platforms such as youtube twitter tik tok and facebook this book is an ideal toolkit for researchers or postgraduate students across the social sciences working with video data as a part of their research projects accessible and practical is written for qualitative and quantitative researchers newcomers and experienced scholars features include interactive activities for different skill levels and what to read next sections to help you engage further with the research mentioned in the book
