carpal tunnel syndrome symptoms

Nov 15 2023

carpal tunnel syndrome is a condition that affects the hand and wrist. It occurs when the median nerve is compressed by the carpal bones in the wrist. This can lead to pain, numbness, and weakness in the hand and wrist. The condition is most common in people who do repetitive work or have a job that involves a lot of typing or using tools. It can also be caused by pregnancy, diabetes, and rheumatoid arthritis. Treatment options include rest, ice, and physical therapy. In severe cases, surgery may be necessary.
