the currently influential book nudge by richard thaler and cass sunstein advocates a range of non regulatory interventions that seek to influence behaviour by altering the context or environment in which people choose and seek to influence behaviour in ways which people often do not notice this approach differs from more traditional government attempts to change behaviour which have either used regulatory interventions or relied on overt persuasion the current government have taken a considerable interest in the use of nudge interventions one aim of this inquiry therefore is to assess the evidence base for the effectiveness of this approach however it also examines evidence for the effectiveness of other types of policy intervention and asks whether the government make good use of the full range of available evidence the committee s central finding is that non regulatory measures used in isolation including nudges are less likely to be effective effective policies often use a range of interventions a lot more could and should be done to improve the evaluation of interventions specific recommendations include the government must invest in gathering more evidence about what measures work to influence population behaviour change they should appoint an independent chief social scientist to provide them with robust and independent scientific advice the government should take steps to implement a traffic light system of nutritional labelling on all food packaging

2010

the roman centurion holding the legionaries steady before the barbarian horde and then leading them forward to victory was the heroic exemplar of the roman world this was thanks to the marian reforms which saw the centurion although inferior in military rank and social class superseding the tribune as the legion s most important officer this period of reform in the roman army is often overlooked but the invincible armies that julius caesar led into gaul were the refined products of 50 years of military reforms using specially commissioned artwork and detailed battle reports this new study examines the roman legionary soldier at this crucial time in the history of the roman republic from its domination by marius and Sulla to the beginning of the rise of julius caesar
