outcomes from a different perspective as key elements in the evolution of culture in this trailblazing book they examine different kinds of decisions and map the outcomes both short and long term drawing on this they introduce a map of social behavior that captures the essential elements of human decision making the authors look at the new england patriots decision in 2000 to draft an underachieving college quarterback named tom brady they consider warren buffett's investment strategy and they chart the dancing landscape of a college applicant's decision making environment finally they show that decisions can be ranked according to transparency of choice and social influence when fake news seems indistinguishable from real news and when the internet offers a cacophony of voices they warn we can't afford to crowdsource our decisions
