the present book is an attempt to touch on one of the most neglected and talked aspects of a significant portion of the population the most vulnerable tribals of mp and also what can be done to build the image of these tribal groups one of the authors has done significant research work in the field by visiting the actual places of residence of the tribal groups under study and has extensively interviewed them as both the authors are from the management stream a new perspective is presented in the book till now this was the domain of the sociologists and the anthropologists but the management perspective will help the readers to view things differently the book is divided into six chapters the first chapter titled image building and understanding the tribes is an introduction to both the tribes as well as what all comprises image building this chapter is basically for those readers who are not acquainted with the tribal groups and what is meant by the terminology like most vulnerable groups the chapter also introduces what image building means chapter two is more about the reports and the works done by the other scholars so that the readers know what other scholars view about the present topic and also the authors have developed their research and the findings based on the work of the scholars of the field chapters three and four comprise the crux of our work these two chapters will help the readers to get an understanding of the culture living styles and every aspect of the life of these mvtgs a comparative study will help the readers to know that though all the three groups are from mp still many differences are there among the three groups and the management of their everyday living and image building will be decided based on these differences forest agriculture migration education culture dance house structure tattoo worship food etc are some of the aspects which are dealt with and all the three groups are compared on these features chapter five deals with the image building aspects with the background of all the marketing concepts required to make the image of these tribes as required and what can be done to enhance the image for the readers having no background in management the chapter is such planned that they get an idea about the basic terminology of promotion and image building chapter six comprises what we feel as researchers and some of the suggestions from our side based on the four years of exhaustive work we have done these suggestions can help the mvtgs to get what they want not using the term including in mainstream so we conclude that this book can be an effort to start the debate from a very new perspective

Image Building among Most Vulnerable Tribal Groups (MVTGs) of Madhya Pradesh

in this book ecoaching pioneer marcia rock draws on best practice research and decades of experience to offer a blueprint for professional development that maximizes teacher and student growth the ecoaching continuum for educators provides teachers administrators and other school professionals a step by step guide to the four connected coordinated components of technology enabled professional development 1 studying theory and practice to build knowledge of specific content and pedagogy 2 observing theory and practice to aid in the transfer of new knowledge to classroom practice 3 one on one coaching to give teachers the feedback they need to improve classroom practice and 4 group coaching to build capacity for identifying and solving problems of professional practice rock offers a practical approach for putting professional development where it can do the most good in the classroom you ll learn why technology is so well suited for authentic job embedded professional development how to cultivate a culture in which the ecoaching continuum can have the greatest impact which technologies are the most useful for carrying out ecoaching in a variety of settings how to capture and evaluate the impact of ecoaching on teachers and students the ecoaching continuum for educators integrates best practice in coaching for professional development with a detailed account of how teachers and other school professionals can use today s technologies to improve their practice and ensure their students are fully engaged and learning
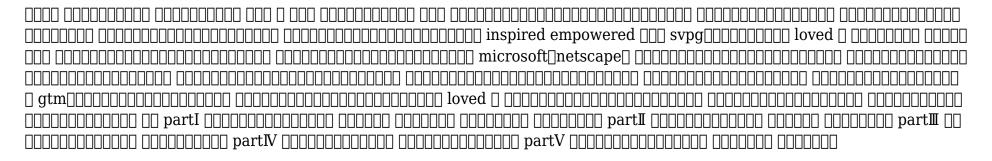

The eCoaching Continuum for Educators

2023-07-16

the difference between part i and part ii volumes 1 2 of this series is that in part i the author showed how what we call reality

starts with the inner self whereas part ii describes what in fact impacts and modifies the environment or reality and what are the factors behind that dynamics what impacts and modifies the environment is science this volume 2 starts by showing how technology plays an important role in scientific progress although the relationship between the two is symbiotic science can exist without technology but technology desperately needs science military technology is an example of how technology can help science advance some military inventions end up having civilian use science being at the center of society the book makes the case for the direct impact of such social sciences as politics and economics on the advancement of science politics says the author influences science because of uncertainty in science and economics does it thanks to the availability of money to scholars and scientists for their research on the other hand government also influences scientific progress through regulations the book gives cyberspace regulation as an example furthermore by showing how art influences science the author really argues for the polyfactorial aspect of scientific progress in that line of thought he goes on to also prove that factors such as skepticism curiosity and the quest for knowledge greatly influence the advancement of science that says the author is a ninety degree turn by ending part two that way i wanted to somehow link it to part i which argues that reality starts from within

The Realities of 'Reality' - Part II: Making Sense of Why Modern Science Advances (Volume 2 of 2)
