Proceedings, Abstracts of Lectures and a Brief Report of the Discussions of the National Teachers' Association, the National Association of School Superintendents and the American Normal School Association

1890

this volume consists of a selection of the albert einstein memorial lectures presented annually at the israel academy of sciences and humanities delivered by eminent scientists and scholars including nobel laureates they cover a broad spectrum of subjects in physics chemistry life science mathematics historiography and social issues this distinguished memorial lecture series was inaugurated by the israel academy of sciences and humanities following an international symposium held in jerusalem in march 1979 to commemorate the centenary of albert einstein s birth considering that einstein s interests activities and influence were not restricted to theoretical physics but spanned broad fields affecting society and the welfare of humankind it

was felt that these memorial lectures should be addressed to scientists scholars and erudite laypersons rather than to physicists alone

A Topical Synopsis of Lectures on Animal Physiology

1885

moving back and forth between the history of philosophy and the contributions of philosophers in his own day durkheim takes up topics as diverse as philosophical psychology logic ethics and metaphysics and seeks to articulate a unified philosophical position remarkably in these lectures given more than a decade before the publication of his groundbreaking book the division of labour in society 1893 the social realism that is so characteristic of his later work where he insists famously that social facts cannot be reduced to psychological or economic ones and that such facts constrain human action in important ways is totally absent in these early lectures for this reason they will be of special interest to students of the history of the social sciences for they shed important light on the course of durkheim s intellectual development

Popular Lectures on Science and Art

1845

melissa bowerman s lectures present a lucid detailed account of her research on how children build up a semantics for domains such as space in their first language and the roles played by adult speech typology and cross linguistic variation

Lectures on the Psychology of Thought and Action

2023-02-23

sidney coleman was the master teacher of quantum field theory all of us who knew him became his students and disciples sidney s legendary course remains fresh and bracing because he chose his topics with a sure feel for the essential and treated them with elegant economy frank wilczek nobel laureate in physics 2004 sidney coleman was a physicist s physicist he is largely unknown outside of the theoretical physics community and known only by reputation to the younger generation he was an unusually effective teacher famed for his wit his insight and his encyclopedic knowledge of the field to which he made many important contributions there are many first rate quantum field theory books the venerable bjorken and drell the more modern itzykson and

zuber the now standard peskin and schroeder and the recent zee but the immediacy of prof coleman s approach and his ability to present an argument simply without sacrificing rigor makes his book easy to read and ideal for the student part of the motivation in producing this book is to pass on the work of this outstanding physicist to later generations a record of his teaching that he was too busy to leave himself

College of Agriculture and Home Economics

1899

in ten lectures on cognitive linguistics and the unification of spoken and signed languages sherman wilcox suggests that rather than abstracting away from the material substance of language linguists can discover the deep connections between signed and spoken languages by taking an embodied view

The Human Aura and the Significance of Color

188?
