Politics, Taxation, and the Rule of Law

2012-12-06

public interest institute began operations in 1992 as iowa s only state level independent research organization as a public policy research organization our four principal goals are to become an information and analysis resource for all iowans provide local state and national policy makers with a rigorous objective and understandable analysis of specific policy initiatives identify practical alternatives for action on critical issues and provide a forum for policy makers and individuals to share ideas and concerns the institute promotes the importance of a free enterprise economic system and its relationship to a free and democratic society it seeks to support the proper role of a limited government in a society based upon individual freedom and liberty concerned citizens are challenged to become better informed about public issues for ideas have consequences and involved individuals can make a difference following the general treatment of how to achieve these ideals contained in limiting leviathan we have continued our series of books designed to examine the topics raised there in greater depth in federalist government in principle and practice we developed the ways in which dividing governmental power between levels such as national and state can help citizens preserve their freedoms in this volume we develop the ways in which property rights do the same

Convention with Japan Relating to Taxes on Income

1954

selection of studies relating to taxation in developing countries the papers are organized under the following subjects fiscal policy and economic development taxation and the external sector taxation of income and wealth taxation of consumption taxation and incentives agricultural taxation urban finance tax administration

Readings on Taxation in Developing Countries

1975

the integration of world capital markets carries important implications for the design and impact of tax policies this paper evaluates research findings on international taxation drawing attention to connections and inconsistencies between theoretical and empirical observations diamond and mirrlees 1971 note that small open economies incur very high costs in attempting to tax the returns to local capital investment since local factors bear the burden of such taxes in the form of productive inefficiencies richman 1963 argues that countries may simultaneously want to tax the worldwide capital income of domestic residents implying that any taxes paid to foreign governments should be merely deductible from domestic taxable income governments do not adopt policies that are consistent with these forecasts corporate income is taxed at high rates by wealthy countries and most countries either exempt foreign source income of domestic multinationals from tax provide credits rather than deductions for taxes paid abroad furthermore individual investors can use various methods to avoid domestic taxes on their foreign source incomes in the process also avoiding taxes on their domestic source incomes individual and firm behavior also differs from that forecast by simple theories observed portfolios are not fully diversified worldwide foreign direct investment is common even when it faces tax penalties relative to other investment in host countries while economic activity and tax avoidance activity is highly responsive to tax rates and tax structure there are many aspects of tax motivated behavior that are difficult to reconcile with simple microeconomic incentives there are promising recent efforts to reconcile observations with theory to the extent that multinational firms possess intangible capital on which they earn returns with foreign direct investment even small countries may have a degree of market power leading to fiscal externalities tax avoidance is pervasive generating

Problems to Keep in Mind when it Comes to Tax Reform

1977

arguments about taxation are among the most heated no other topic is as influential to the role of government and the distribution of costs and benefits in america but while understanding of our tax

system is of vital importance the complexity can create confusion two of america s leading authorities on taxes leonard e burman and joel slemrod bring clarity in this concise explanation of how our tax system works how it affects people and businesses and how it might be improved the book explores what makes a tax system fair simple and efficient why our system falls short and whether the new tax law promises much if any improvement accessibly written and organized in a clear question and answer format the book describes the intricacies of the modern tax system in an easy to grasp manner it has been revised and updated to both explain the tax cuts and jobs act tcja in 2017 the most comprehensive reform of its income tax system since 1986 and to examine its likely effects on individuals businesses and society among the questions discussed are how much more tax could the irs collect with better enforcement how do tax burdens vary around the world why do corporations pay so little tax even though they earn trillions of dollars every year what kind of tax system is most conducive to economic growth and can taxes be fair

an examination into stockholm s seven month long trial period with congestion taxes this collection of articles analyzes the political and administrative processes of the first swedish congestion experiment and its aftermath describing the preoccupations hopes and impressions that came along with the trial period and how feelings fluctuated among the inhabitants of stockholm before during and after the trial this study provide tools for avoiding the pitfalls with hopes that the successes of the stockholm trial will be repeated in other contexts

Taxes in America

2020-02-15

environmental taxes differ from each other according to the functions they serve and the manner in which they are implemented this study highlights the appropriateness of different kinds of environmental taxes against a rigorous framework of theory and case study evidence the purpose of this book is to analyse the way in which environmental taxes are categorized and which factors affect the effectiveness and efficiency of the different kinds of environmental taxes in practice this pragmatic approach is emphasized along with the multiplicity of regulatory problems such as at what level should the environmental tax rate be set what is the proper time schedule for introducing an environmental tax what are the most appropriate taxable characteristics and how should they be determined what activities should be exempt from environmental taxation how can tax relief be implemented these are only some of the regulatory problems explored in this study which also encompasses an examination of the theory of regulation the author argues that economists have often paid too little attention to the administrative and legal issues concerning the implementation of legislation such as environmental tax laws which are of course vital to the success of any potential policy lawyers too have in turn neglected the theory of regulation which would assist in analysing problems in a future oriented way environmental taxes will therefore be of great interest to a wide audience of environmental economists law and economics scholars as well as policymakers back cover

A Sketch of the History of Taxes in England from the Earliest Times to the Present Day

Environmental Taxes

2006-01-01

taxes on the wealthy are a topic sure to incite venomous rants from both right wing and left wing ideologues the topic attracts conflicting interpretations and policy recommendations and generates proposals for tax reform that consume political debate all this activity takes place against an opaque backdrop of empirical evidence dealing with the distribution of wealth and income and tax avoidance and tax evasion by corporations and wealthy individuals rethinking wealth and taxes explores these problems and considers the possibilities for increasing taxes on wealth to address the increasingly unequal distribution of wealth and income

Taxes on Incomes, Inheritances, and Gifts

1956

this paper examines the level and structure of fiscal revenues from the baltics russia and other former soviet union countries bro energy sector and suggests reforms in energy tax policy revenues from the oil and gas sectors are about half the level that might be expected from international comparisons low oil revenues result from infrastructure constraints on oil exports weak tax administration and inappropriate tax structures low gas revenues are due to low statutory tax rates a tax structure that does not capture monopoly or resource rents and weak tax administration taxation of oil products could be increased

Application of a State Sales and Use Taxes to Transactions in Federal Areas

1940
