Getting It Right 1992-11-16 getting it right is the first insider's account of this period of regional development in Canada. Harley McGehee draws on his experience with the government at senior regional and departmental levels and on primary and secondary sources to examine the evolution of federal regional development policies and the structures developed between 1970 and 1991 to implement them. He dispels some of the myths and challenges some of the perceptions about the manner in which regional development has been tackled by governments in Canada. He explores the federal provincial dimensions of regional development as well as the difficulty of reconciling the perceived dichotomy between national and regional policies. McGehee argues that the 1982 move away from the three model of regional development was a mistake and suggests that the predilection of governments for reorganising existing instruments of regional development policy and creating new ones has been detrimental to regional economies. Mindful of the new realities of the global economy within which Canada and its regions must compete and of the promise and threat of rapidly changing technology, McGehee identifies the need for a new order of priorities with which governments can meet these challenges and opportunities.

Prussia in the Historical Culture of the German Democratic Republic 2022-10-06 no example demonstrates the fluidity of the past within the German Democratic Republic more powerfully than the history of the Prussian state. Initially attacked in East German official histories as the historical engine of German militarism and reaction, Prussia underwent a remarkable transformation in official and public memory from around the end of the 1970s. This was the so-called Prussia Renaissance in which for the first time the East German state began to recognise and even celebrate figures from Prussian history who had not served a progressive agenda. But the Prussia Renaissance was also a political and cultural phenomenon with a wide public resonance. The Prussia Renaissance may have been a relatively short-lived phenomenon, but it evidently opened a deep vein in the historical memory of the German Democratic Republic that defied reduction to high politics alone. This book asks why, using the case study of Prussia. Marcus Colla presents a multi-perspective approach to the way that a distinctive historical culture was constructed in the German Democratic Republic. It not only evaluates the roles played by political figures, historians, and cultural elites, but also heritage preservationists, exhibition curators, Heimat museums, television producers, novelists, and playwrights and singers, the purveyors of what we might more generally term popular culture. In essence, Colla poses four fundamental questions for our understanding of life, politics, and culture in Communist East Germany: how was history there made, how was it understood, how was it contested, and how was it used?

Budget Issues for Fiscal Year 1983 1982 in the enchantments of technology, Lee Worth Bailey erases the conventional distinction between myth and machine in order to explore the passionate foundations concealed in technological culture and address its complex ethical, moral, and social implications. Bailey argues that technological society does not simply disenchant the world with its reductive methods and mechanical metaphors; then shape machines with political motives, but is also borne by a deeper, subversive undertow of enchantment. Addressing examples to explore the complexities of these enchantments, his thought is full of illuminating examinations of seductively engaging technologies ranging from the old camera obscura to new automobiles, robots, airplanes, and spaceships. This volume builds on the work of numerous scholars, including Jacques Ellul and Jean Brun on the phenomenological and spiritual aspects of technology; Carl Jung on the archetypal, collective unconscious approach to myth; and Martin Heidegger on being itself. Bailey creates a dynamic, interdisciplinary, postmodern examination of how our machines and their environments embody not only reason but also desires.

The Enchantments of Technology 2010-10-01 an extraordinary work of intellectual history as well as a scholarly tour de force, a bracing polemic, and a work of Christian prophecy. M. C. Carragher challenges more than 200 years of post-enlightenment assumptions about the way we live and work. The observer, at least since Max Weber, capitalism has been understood as part of the disenchantment of the world, stripping material objects and social relations of their mystery and magic. In this magisterial work, Eugene M. Carragher challenges this conventional view. Capitalism, he argues, is full of sacrament. Whether one is prepared to acknowledge it or not, first flowering in the fields and factories of England and brought to America by Puritans and Evangelicals, whose doctrine made ample room for industry and profit, capitalism has become so thoroughly enmeshed in the fabric of our society that our faith in the market has become sacrosanct, informed by cultural history and theology as well as management theory. The Enchantments of Mammon looks to

nineteenth century romantics whose vision of labor combined reason creativity and mutual aid for salvation in this impassioned challenge to some of our most firmly held assumptions mccarraher argues that capitalism has hijacked our intrinsic longing for divinity and urges us to break its hold on our souls a majestic achievement it is a work of great moral and spiritual intelligence and one that invites contemplation about things we can't afford not to care about deeply commonweal more brilliant more capacious and more entertaining page by page than his most ardent fans dared hope the magnitude of his accomplishment an account of american capitalism as a religion will stun even skeptical readers christian century
