

Free epub Teenage pregnancy paper (PDF)

teenagers should be educated about the negative consequences of teenage pregnancy especially by their parents and at school our results confirm the relatively high prevalence of pregnant adolescent girls who smoked this research examines whether a mother's teenage childbearing or an older sister's teenage pregnancy more strongly predicts teenage pregnancy this study used linkable administrative databases housed at the manitoba centre for health policy mchp this paper contributes to understanding of the broader topic who is influential about what within the family the teenage pregnancy risk seen in younger sisters when older sisters had a teenage pregnancy appears based on the interaction with that sister and her child the family environment experienced by the siblings is quite similar teen pregnancy prevention one of the great public health challenges of our time has been teen pregnancy in recent years however teen birth rates in the united states have declined substantially to historic record lows since the most recent peak in the early 1990s preventing teen pregnancy needs to be a multifaceted societal collaboration agencies that coordinate their services can best ensure that pregnant teens receive early and excellent prenatal care and ongoing sustained support for nurturing babies and young children although teen pregnancy rates have declined considerably over the past few decades in the united states and in most of the other 20 countries with complete statistics the teen pregnancy rate is still highest in the united states with 57 per 1 000 among five to 19 year old frontiers adolescent pregnancy an important issue for paediatricians and primary care providers a position paper from the european academy of paediatrics front pediatr 07 february 2023 sec general paediatrics and pediatric emergency care volume 11 2023 doi org 10 3389 fped 2023 1119500 abstract background teenage pregnancy rates are falling in many high resource settings but for those who do conceive the socioeconomic and educational disadvantage that ensues is often long lasting and intergenerational when the groups were compared in terms of risk factors in pregnancy it was found that pregnancy in adolescence was associated with a 3 04 fold higher risk of smoking 5 25 fold higher risk of being unmarried 3 50 fold higher risk of preeclampsia and 1 70 fold higher risk of intrauterine growth retardation iugr teen pregnancy is a social problem not resolved in developing and some developed countries adolescent fecundity has become the most exact bio demographic and health indicator of development who departments has initiated a series of literature reviews and discussion papers in order to identify existing recommendations on clinical management and to assess how appropriate these are for adolescents across a wide range of health issues woman admits killing pregnant teenager for her baby clarisa figueroa 51 of chicago pleaded guilty and was sentenced to 50 years in prison prosecutors say she strangled the young mother and teenage pregnancy was found to be 1 6 times 95 ci 1 10 2 16 more likely to occur in adolescent women living with a single parent and 8 2 times 95 ci 6 54 10 23 more likely in adolescent women living with neither parent compared with adolescent women living with both parents almost all participants viewed teenage pregnancy as a more common occurrence in their community than in schools participants identified poverty peer pressure and poor parental control as results the factors contributing to teenage pregnancy included lack of school fees lack of parental care communication and supervision poverty peer pressure non use of contraceptives desire for a child forced marriage low educational level and need for dowries this study reveals the need for future research and focus on supporting the strengths of teen mothers rather than treating teen pregnancy and parenthood only as a social problem another need is education on effective communication between parents and children regarding sexual activity and pregnancy and breaking the barriers that create an uncom from parents on teenage girls to get married non use of contraceptives and economic factors are some causes of teenage pregnancy the study also revealed that drop out from school health risks isolation and rejection by parents and peers are some effects of teenage pregnancy and that sufficient parental care sex educa summary most teenage girls don't plan to get pregnant but many do teen pregnancies carry extra health risks to both the mother and the baby often teens don't get prenatal care soon enough which can lead to problems later on they have a higher risk for pregnancy related high blood pressure and its complications a teenage pregnancy as defined by the american pregnancy association is a pregnancy that occurs for a woman under the age of 20 although technically not a teenager a young woman 12 or under who is pregnant falls into this definition of teenage pregnancy as well results the prevalence of teen pregnancy in ethiopia decreased significantly from 15 9 95 ci 14 3 17 7 in 2005 to 12 5 95 ci 10 8 14 3 in 2016 multivariate decomposition analysis showed that approximately 83 of the overall change in teen pregnancy over time was due to differences in women's composition
