Essentials of Pharmaceutical Analysis

2019-12-17

recent advances in the pharmaceutical sciences and biotechnology have facilitated the production design formulation and use of various types of pharmaceuticals and biopharmaceuticals this book provides detailed information on the background basic principles and components of techniques used for the analysis of pharmaceuticals and biopharmaceuticals focusing on those analytical techniques that are most frequently used for pharmaceuticals it classifies them into three major sections and 19 chapters each of which discusses a respective technique in detail chiefly intended for graduate students in the pharmaceutical sciences the book will familiarize them with the components working principles and practical applications of these indispensable analytical techniques

uncertainties are inevitable in any experimental measurement therefore it is essential for science and engineering graduates to design and develop reliable experiments and estimate the uncertainty in the measurements this book describes the methods and application of uncertainty analysis during the planning data analysis and reporting stages of an experiment this book is aimed at postgraduate and advanced undergraduate students of various branches of science and engineering the book teaches methods for estimating random and systematic uncertainties and combining them to determine the overall uncertainty in a measurement in addition the method for propagating measurement uncertainties in the calculated result is discussed the book also discusses methods of reducing the uncertainties through proper instrumentation data acquisition and experiment planning this book provides detailed background and assumptions underlying the uncertainty analysis techniques for the reader to understand their applicability various solved examples are provided to demonstrate the application of the uncertainty analysis techniques the exercises at the end of the chapters have been chosen carefully to reinforce the concepts discussed in the text

this mining environment management manual is developed for the benefit of the entire mining industry in the country the manual has been designed in such a manner that it can be easily used by the engineers and environmentalists in the mining complexes in their efforts for the management of mining environment the manual presents the existing status and comprehensive overview of all the aspects of mining environment since environment is a developing subject the user of the manual is suggested to wherever necessary consult the web sites of moef and other concerned organizations for the latest status the manual in nineteen chapters outlines the following for the benefit of the users 1 broad details of the mineral mining industry in the country 2 policies legislation standards and procedures for establishing and operating the mines covering an environmental overview of the national policies and the policies of the mining companies mining and environmental legislations and standards site selection environmental clearance forestry clearance and the various formats to be filled or establishing and operating the mines 3 preparation of the environmental management plans emps of the mining projects 4 environmental monitoring 5 mining methods commonly used in the indian coal and non coal mineral industry 6 environmental impacts of mining on society ecology land water regime and atmosphere 7 environmental impact assessment eia 8 environmental management measures required in mineral mining including the assessment of quality of life development of r r packages development of surface and underground water bodies replantation of trees formation and management of soil and overburden dumps environmental aspects of blasting land reclamation and rehabilitation planning mine fires acid mine drainage inundation noise modeling etc 9 mine closure comprising of legislative and social necessity of mine closure in the indian context mine closure planning for underground and opencast mines and format for mine closure planning in project report 10 procedure for environmental performance auditing and evaluation 11 land acquisition and optimization of land requirement for mining and associated activities and rehabilitation and resettlement 12 land use planning in mining areas 13 risk assessment and disaster management 14 environmental aspects of tailing storage 15 use of geographical information system in environmental management in mining areas 16 utilization of fly ash in mines 17 environmental economics 18 roles of executives in environmental management in mining areas 19 do s and don ts in environmental management planning and implementation the manual in simple english aims at to attract attention of one and all concerned with the management of mining environment the manual will be useful to the following categories of the people in the mining complexes in the country and abroad mine planners in planning and designing of the mining activities and integration of environmental management measures in the mining methods mine operators in implementing the environmental management measures monitoring and compliance of legislation regulatory agencies and their executives in developing a better understanding of the mining environment related aspects and implementing the legislation research workers in planning designing and undertaking research and development activities educationists in imparting the knowledge and know how to the participants in various academic and human resource development programs the non governmental organizations ngos in developing a better understanding of the mining environment and assisting the mineral industry in effective implementation of the environmental management efforts the people in the mining complexes in developing the understanding of various aspects of the management of mining environment in addition the manual will be an important addition to the knowledge base in the libraries of all the institutions and organizations associated with mining and environmental management the user is advised to read the manual carefully and understand the various topics discussed and then use their own wisdom and the suggestions made in the manual in design planning implementation and monitoring of the mining activities the legislative aspect of mining environmental management

is dynamic and time to time changes are made in the acts rules and regulations by the central and state governments the user is therefore advised to get abreast with the latest developments through the web sites of the moef and the central and state pollution control boards and other regulatory agencies e g dgms ibm etc

assessing the microbiota biodiversity of fermented food products such as bacterial and fungal diversity can inform on the nutritional value of such products as well as assessing the safety for consumption understanding the bacterial or fungal composition of such products is important to ensure food safety and prevent possible contamination with foodborne pathogens which may have serious public health implications for example the u s food and drug administration 2014 tested samples of cheeses prepared using unpasteurized milks and identified the presence of listeria monocytogenes and shiga toxin producing escherichia coli
