Education and Conflict 2005

this project aimed to undertake a scoping study of existent and potential research into the relationship between education and conflict peace building and post conflict situations both nationally and internationally within this aim the project investigates the main research dimensions of this area identifies gaps in the research literature summarises key findings that emerge from the literature and suggests future areas of

research keyword searches of educational databases were conducted in order to identify relevant materials published between 1997 and 2004 those items that were considered key texts or those that were easily accessible were read in depth the project did not aim to review the literature but to identify the key themes and gaps one author also attended two conferences and used the internet to search for additional materials and keep in touch with relevant online discussion groups it is estimated that half of the 104 million children not attending primary school live in countries in or recovering from conflict countries that have lost educational infrastructure as a result of war are less likely to reach the dakar goal of primary education for all by the year 2015 reported findings include 1 the field of education and conflict is in its infancy 2 there is much material that addresses the challenges involved in providing education in conflict affected and post conflict areas 3 little research or evaluative evidence exists from education programmes that operate in conflict and post conflict areas 4 research evaluation and monitoring are often low on the list of priorities for practitioners working in conflict circumstances 5 despite the lack of material in the public domain there is a significant amount of unpublished evidence such as internal reports and evaluations conducted by agencies and consultants working in the field research and development of practice is hindered by the fact that much of this reflective material is not available more widely 6 a research practice gap limits the amount of evidence from which further interventions can be planned by practitioners and policy makers 7 those working in the field of education and conflict have made a significant contribution to challenging the assumption that education is always a positive force in areas of conflict but due to the research practice gap these developments may not feed into theory 8 peace education is well documented in the literature on education and conflict although much of the material is opinion based descriptive rather than evidence based 9 at a national level peace education is closely allied to civic education and citizenship education but the links between these topics are not well researched in conflict affected areas and 10 although difficulties facing agencies seeking to implement education in conflict situations are thought to be well known at least one study revealed that in practice the challenges may be different the report recommends 1 expansion of centralised data collection regarding the provision of education in conflict situations 2 greater use of the internet and e discussions for dissemination of research and network building 3 use of user friendly tools in research reports 4 greater use of professional researchers to provide consultancy on monitoring and evaluation to practitioners working in the field and 5 greater collaboration between practitioner agencies and academics three areas are identified for further research to 1 look at the role of education as a tool for protection 2 investigate the links between citizenship education and peace education and 3 examine ways in which governments and ngos can support schooling initiated by parents three appendixes are included 1 websites of interest 2 literature search strategy and 3 the inter agency network on education in emergencies inee contain 9 footnotes

Handbook of Regional Conflict Resolution Initiatives in the Global South 2022-07-28

during the first half of the twentieth century the international system was largely dominated by the usa and the colonial powers of western europe after the two world wars the political and economic dominance of these states guaranteed them and their allies an almost complete control of world politics however as it is the norm in the international system power structures are not immutable after the end of the cold war rapid changes to the existing international hierarchies took place as new countries from the so called developing world began to emerge as crucial actors capable of questioning and altering the power dynamics of the world it is therefore unthinkable to ignore emerging countries such as russia the people s republic of china india brazil or south africa in the decision making process in today s world order in addition there is a group of smaller yet increasingly important countries that while acknowledging their inability radically to change the rules of the international system are still eager to shift power relations and enhance their influence in the world argentina colombia egypt indonesia iran

south korea mexico nigeria pakistan saudi arabia turkey and vietnam are generally recognised as part of this grouping of emerging powers from the global south while there is a consensus amongst academics that emerging powers from the global south must have a stabilising role within their own regions previous analyses have focused primarily on the impact that emerging powers have had in their own regions conflict resolution initiatives this volume instead aims to go beyond these analyses and provide new insights regarding the effect that this stabilising role has on the continental and global positioning of emerging powers in other words this book explores the relation between a country s involvement in conflict resolution initiatives and its positioning in the international system the volume will contribute to this approach using the perspective of academics and practitioners from countries of the global south particularly from states that have strengthened or sometimes weakened their position in the international hierarchy of power through a leading role in regional conflict resolution initiatives

Conflict in Africa 2015-03-08

do modern western ideas about the nature of conflict and its resolution apply to africa to answer this question adda bozeman examines conflict in africa south of the sahara in its many social political and cultural aspects past and present the author shows how african perspectives on war and diplomacy have evolved under the influence of nonliteracy tribalism and a concept of undifferentiated time in addition she confirms that indigenous cultural traditions are resurgent everywhere making it unlikely that african political values will become more closely aligned with those of the west the two civilizations view conflict differently and have different ways of resolving it the africans are more at ease with conflict than their western counterparts and they do not see war and peace as the mutually exclusive phenomena that occidental societies hold them to be the author concludes that modern western concepts of conflict not only do not but cannot allow for african realities originally published in 1976 the princeton legacy library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of princeton university press these editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions the goal of the princeton legacy library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by princeton university press since its founding in 1905
