Bibliography of Fading on Microwave Line of Sight Tropospheric Propagation Paths and Associated Subjects *1964*

this is the first textbook that contains a holistic treatment of antennas both for traditional antennas mounted on masts line of sight antenna systems and for small antennas used on modern wireless devices such as smart phones being subject to signal variations fading due to multipath propagation the focus is on characterization as well as describing classical antennas by modern complex vector theory thereby linking together many disciplines such as electromagnetic theory classical antenna theory wave propagation and antenna system performance overall this book represents a rethinking of the way basic antenna theory is presented the book contains many references to important old and new papers and books on the analysis and design of the most useful antenna types for the most interested readers
