the big short by michael lewis book summary sometimes our minds wonder if what is happening in the world is actually right even though we are often convinced that nothing outright evil might be taking place sometimes we have dreams of becoming the people we see in the media who seem like paragons of success or gods of the corporate world though ignorance may be bliss or what we do not know may not harm us directly sometimes a small revelation into some issues and matters in the community or a nation goes a long way into adjusting our attitudes and sails of life it may become a reference point to use in raising our children and with the wisdom thereof equip them with the truth so that they may also endeavour to come up with solutions when their time comes as michael lewis writes he hopes that college students trying to decide what to do with their lives might read it and decide that it s silly to phony it up and abandon their passions or even their faint interests to become financiers he hoped that some bright kid at ohio state university who
