published in 1997 this book traces the development of european food aid policy from its inception in the 1960s through to the 1990s this covers the change from a surplus disposal programme in the early days to

the present policy the european food aid policy is one of the few areas of development policy that is european rather than national in character john cathie therefore also examines the links forged with non governmental organizations at an international level for food aid and humanitarian operations

European Food Aid Policy 1992-10-23

since the colombo plan in the early 1950s food aid has been an important and highly visible component of the canadian development assistance program until the early 1970s however the canadian food aid program was little more than a loosely connected collection of disparate programs designed to meet a host of sometimes conflicting objectives in the wake of the world food crisis of 1972 75 a growing number of groups began to question the developmental effectiveness of food aid in response the canadian government undertook an extensive review and assessment of its food aid program which resulted in a series of new policy initiatives designed to change both the substance of food aid programs and the manner in which they were administered these changes marked a watershed in the history of the canadian food aid program setting out the fundamental policy themes that have been consolidated and refined in the 1980s and early 1990s

aid to developing countries started well before world war ii but was undertaken as an ad hoc activity or was delivered by private organizations this changed after the war in his inaugural address in 1949 the american president harry truman announced a bold new programme for making the benefits of our scientific advances and industrial progress available for the improvement and growth of underdeveloped nations the so called point iv plan at that time it was thought that this support would be needed only for a limited number of years comparable to the marshall plan assistance to europe but reality proved to be different providing aid was a very long term affair since the fifties the aid provided has changed at different occasions in the beginning aid concentrated on constructing infrastructure such as roads railways dams and harbours in order to promote industrial development in the sixties aid to agriculture was added and in the seventies aid to social sectors basic needs was also provided the eighties brought worldwide debt problems major donors applied structural adjustment policies some called this the lost decade *década perdida* the nineties saw the arrival of the first environmental considerations and asked for attention for the role of women and good governance the form of aid changed from projects to programmes and budget support describing the different aid forms of the last 65 years and analysing why aid changed from time to time are the subjects of this book professionals and students in the area of international cooperation will benefit from studying this history as at this moment old concepts are reappearing or applied by new donors like china is

the pendulum really swinging back as louis emmerij at one point suggested

Foreign Assistance Authorization, Examination of U.S. Foreign Aid Programs and Policies *2015-10-30*

this reissue first published in 1976 considers the rapid rate of economic growth in kenya combined with its apparent political stability to determine whether or not this is indeed a case of growth without development and if so where the responsibility for aid lies in this situation the book concludes that while kenyan growth has not been to an ideal pattern accompanied by an increase in inequality there is little or no reason to believe that living standards have not improved it examines the impact of aid on kenya s progress at both the microeconomic and macroeconomic level and provides an institutional study of the impact of aid on kenyan government policy formation and administration and a discussion of british aid s political purposes and influence in kenya the authors conclude that some of the effects predicted by the critics of aid are visible but that the net effect on general living standards has been strongly positive concluding that the problems constitute a case for improving aid procedures but not against aid itself

in 1998 the world bank published a report entitled assessing aid what works what doesn't and why this report presents the results of an extensive investigation into the effectiveness of development aid the main message of the text of the report is that development aid helps but only when there is a good policy environment in the recipient countries that is when there is sound macroeconomic management and when robust government institutions exist it stresses that it is a myth to think that good policies can be bought by giving development aid giving aid conditional on policy reforms does not lead to improved economic

policies the conclusion of the world bank report is that aid flows should be directed only to countries with sound policies and that it should be focused more on supporting governments in reforming entire sectors rather than on specific development projects the assessing aid report has led to heated debates both among academics and policy makers about development aid and aid policies many have questioned the methodology used the results and the policy conclusions of the report this book aims to contribute to the ongoing discussion about the future of development aid in particular it re examines a number of issues that are crucial to the analysis and to the conclusions of the world bank report in this study the authors aim to put the discussion on the future of development aid into perspective and summarise the main findings of the other studies in this collection they focus on two issues the aid effectiveness debate before and after the assessing aid report and the discussion on policy conditionality and good governance section ii provides a brief survey of past research on aid effectiveness that is before publication of the assessing aid report and summarises the main findings of the world bank report on aid effectiveness in this study the authors aim to put the discussion on the future of development aid into perspective and summarise the main findings of the other studies in this collection they focus on two issues the aid effectiveness debate before and after the assessing aid report and the discussion on policy conditionality and good governance section ii provides a brief survey of past research on aid effectiveness that is before publication of the assessing aid report and summarises the main findings of the world bank report on aid effectiveness
