### **The Routledge Companion to Cost Management 2013-08-22**

managerial cost accounting is the financial and managerial tool that is used to estimate the organizational cost of products and services in business and government in recent decades cost accounting in the united states and other advanced industrial countries has been dominated by discussions of activity based costing or abc while abc can be shown to produce a more accurate estimate of cost than older and more basic types of cost accounting abc is not used extensively in many governments we argue that this recent focus on abc has stifled examination and discussion of how government cost accounting is being used and how it could be used in practice the study of cost accounting practice reveals an important and underexplored area of financial management in government given the scandals that cost accounting estimates can create and that different types of cost accounting can create different estimates of cost it may be reasonable to ask whether the cost accounting exercise is worth it cost accounting in government theory and applications addresses these unusual and unusually important topics through a series of studies of different government cost accounting practices the first section of the book presents two chapters on the history and basic elements of cost accounting

the second section of the book provides further discussion and case studies of actual cost accounting practices in the main areas that cost accounting has been used in government benchmarking the performance of government services rate setting grant overhead cost recovery and cost management the last two chapters discuss cost accounting practices in europe and the future of cost accounting these cases span local and federal governments and provide a much needed context to the study of cost accounting in government aimed at academics researchers and policy makers in the fields of accounting public administration and government studies cost accounting in government theory and applications seeks to address the practical and theoretical gap in government cost accounting research with case studies of different public agencies that are using cost accounting for different purposes the case studies illustrate that different purposes for cost accounting create unique and interesting cost accounting practices the case studies provide useful examples of actual cost accounting systems that can inform both research and instruction

### ***Report 1954***

volume 18 of research on professional responsibility and ethics in accounting continues the series focus on the nature of interactions between accountants regulators and standard setters

investigating how and why accountants resolve the dilemmas that occur

## **Performance Measurement and Management 2005-03-08**

when marketing managers and financial managers join forces within any business the result can often be poor communication on financial criteria and goals the risk of this situation occurring is inevitably present when those with different professional backgrounds and roles are working in accordance with their own norms in his seminal 1956 paper on general systems theory the economist kenneth boulding referred to the phenomenon of specialised ears and generalised deafness which can be seen to exist when marketing managers are financially illiterate or when financial managers lack the necessary insights to design implement and operate accounting systems which are useful to marketing managers in carrying out their roles it is increasingly difficult to attach credence to the idea of marketing managers who lack financial skills or financial managers who fail to relate to the context in which marketing managers operate understanding the marketing accounting interface is therefore important in generating emergent properties from the interaction of marketers and accountants whereby the whole is greater than the sum of the parts the chapters in this volume seek to address this challenge this book was originally published as a special issue of the journal of marketing management
