the battle of shrewsbury in 1403 is one of the most important battles in english history king henry iv faced his erstwhile ally henry percy earl of northumberland in a bloody contest on a field outside the shropshire town of shrewsbury where two english armies well matched and fighting with similar equipment and tactics struggled in an archery duel in which the arrows fell like leaves in autumn before the battle was ultimately decided in close quarter hand to hand combat with his victory henry iv secured the lancastrian hold on the kingdom and demonstrated the right of his bloodline to the throne using full colour artwork and specially commissioned battlefield maps and illustrations this is the fascinating story of the battle without which the reign of henry v his wars and glorious victories against the french and the later disastrous reign of henry vi and subsequent wars of the roses could not have happened

State Legitimacy in a Fragile Context 2020-02-18

during the course of the last decades the state experienced a revival on the scene of international development as there has been a growing acknowledgment amongst the international development community that the state plays a key role in enabling development in a specific society therefore the role of the state and especially the concept of state building have occupied a central place in the development discourse in that respect a growing interest has manifested itself in the discussion and analysis around so called fragile states the author discussed the development discourse around that state building paradigm in general and focuses through its field research in colombia specifically on the question of the state legitimacy in so called fragile contexts

Revolution and Rebellion in the Early Modern World 1991-04-02

what can the great crises of the past teach us about contemporary revolutions arguing from an exciting and original perspective goldstone suggests that great revolutions were the product of ecological crises that occurred when inflexible political economic and social institutions were overwhelmed by the cumulative pressure of population growth on limited available resources moreover he contends that the causes of the great revolutions of europe the english and french revolutions were similar to those of the great rebellions of asia which shattered dynasties in ottoman turkey china and japan the author observes that revolutions and rebellions have more often produced a crushing state orthodoxy than liberal institutions leading to the conclusion that perhaps it is vain to expect revolution to bring democracy and economic progress instead contends goldstone the path to these goals must begin with respect for individual liberty rather than authoritarian movements of national liberation arguing that the threat of revolution is still with us goldstone urges us to heed the lessons of the past he sees in the united states a repetition of the behavior patterns that have led to internal decay and international decline in the past a situation calling for new leadership and careful attention to the balance between our consumption and our resources meticulously researched forcefully argued and strikingly original revolutions and rebellions in the early modern world is a tour de force by a brilliant young scholar it is a book that will surely engender much discussion and debate

since the fall of president suharto in may 1998 indonesia the third largest country in asia has been facing a political economic and social crisis racial and religious clashes culminating in riots burning and chaos have become a daily event throughout the country there are signs that this multi racial multi religious and multi cultural country may disintegrate just as yugoslavia and the soviet union there are two major reasons why indonesia is facing the crisis first suharto failed to keep the balance of power between the armed forces and islam just as sukarno had failed in his interplay of strength between communism and the armed forces when the balance was tilted chaos and disasters followed the second reason is that the indonesian people at least a section of them have lost the spirit of tolerance symbolised in the indonesian state crest bhenneka tunggal ika unity in diversity which is so vital in a multi religious and plural society the mass killing of thousands of ethnic chinese on 13 may 1998 the appearance of mysterious ninja murders the burning of churches and mosques and the religious clashes between christians and muslims in ambon have all indicated that this spirit of tolerance which was once so strongly imbedded in the indonesian culture is fast evaporating there seems to be no more rule of law in the country the cry for jihad among the muslims in jakarta to take revenge on the christians in ambon is making the more moderate religious leaders panicky there is a tendency among the indonesians to take the law into their own hands some extreme muslims even hope to establish an islamic state of indonesia economically indonesia scommerce and industries have been ruined with foreign investors shunning the country millions of people are dying everyday from hunger the economic situation is deteriorating everyday the author of this book is the for

this volume is concerned with diplomacy between england and the papal curia during the first phase of the anglo french conflict known as the hundred years war 1305 1360 on the one hand barbara bombi compares how the practice of diplomacy conducted through both official and unofficial diplomatic communications developed in england and at the papal curia alongside the formation of bureaucratic systems on the other hand she questions how the anglo french conflict and political change during the reigns of edward ii and edwardiii impacted on the growth of diplomatic services both in england and the papal curia through the careful examination of archival and manuscript sources preserved in english french and italian archives this book argues that the practice of diplomacy in fourteenth century europe nurtured the formation of a shared language of diplomacy the latter emerged from the need to translate different traditions thanks to the adaptation of house styles formularies and ceremonial practices as well as through the contribution of intermediaries and diplomatic agents acquainted with different diplomatic and legal traditions this argument is mostly demonstrated in the second part of the book where the author examines four relevant case studies the papacy s move to france after the election of pope clement v 1305 and the succession of edward ii to the english throne 1307 anglo papal relations between the war of st sardos 1324 and the deposition of edward ii in 1327 the outbreak of the hundred years wars in 1337 and lastly the conclusion of the first phase of the war which was marked in 1360 by the agreement between england and france known as the treaty of bretigny calais
