unit iii engineering as social experimentation

Nov 29 2022

engineering as experimentation experimentation plays an important role in the process of designing the product when it is decided to change a new engineering concept into its first rough design preliminary tests or simulation should be conducted using formal experimental methods the materials and methods of designing are tried out

engineering ethics social experimentation

Oct 29 2022

engineers as experimenters in the process of developing a product an engineer generally learns through experimentation to simply put a trial and error method is the mostly used one to obtain results but that goes with some calculations hence we can say that primarily any experiment is carried out with partial ignorance
