XSLT and XPATH

2002

this book shows xml programmers how to use xslt to transform xml documents

Focus on Multidimensional Microscopy

1999

this book covers various aspects of modern microscopy with emphasis on multidimensional three dimensional and higher and multimodality microscopy the topics discussed include multiphoton fluorescent microscopy confocal microscopy x ray microscopy and microtomography electron microscopy probe microscopy and multidimensional image processing for microscopy in addition there are chapters demonstrating typical microscopical applications both biological and material

Conflict Resolution

2003

conflict is a part of life it occurs in many forms in many different locations and situations and involves a broad range of people of all ages the ability to identify and resolve conflict is an essential skill that can be taught at an early age these books help you to develop the skills necessary to manage and resolve conflict in a variety of everyday situations

Cryo-Electron Tomography

1990

this volume contains selected and invited papers presented at the international conference on computing and information icci 90 niagara falls ontario canada may 23 26 1990 icci conferences provide an international forum for presenting new results in research development and applications in computing and information their primary goal is to promote an interchange of ideas and cooperation between practitioners and theorists in the interdisciplinary fields of computing communication and information theory the four main topic areas of icci 90 are information and coding theory statistics and probability foundations of computer science theory of algorithms and programming concurrency parallelism communications networking computer architecture and vlsi data and software engineering databases expert systems information systems decision making and ai methodologies

Advances in Computing and Information - ICCI '90

2012-12-02

this volume is the most comprehensive reference work on visual communications to date an international group of well known experts in the field provide up to date and in depth contributions on topics such as fundamental theory international standards for industrial applications high definition television optical communications networks and vlsi design the book includes information for learning about both the fundamentals of image video compression as well as more advanced topics in visual communications research in addition the handbook of visual communications explores the latest developments in the field such as model based image coding and provides readers with insight into possible future developments displays comprehensive coverage from fundamental theory to international standards and vlsi design includes 518 pages of contributions from well known experts presents state of the art knowledge the most up to date and accurate information on various topics in the field provides an extensive

overview of international standards for industrial applications

Handbook of Visual Communications

2011-07-27

volume is indexed by thomson reuters cpci s was this second collection on advanced measurement and test ii is dedicated to the electronic testing of devices boards and systems covering the complete cycle from design verification design for testing design for manufacturing silicon de bugging manufacturing testing system testing diagnosis failure analysis and back to process and design improvement this will be an invaluable guide to the topics

Advanced Measurement and Test

2024-04-24

this comprehensive book on business communication is tailored for both undergraduate and postgraduate students it covers fundamental communication concepts various skills and includes real world examples with easily understandable language an impressive design and exhaustive coverage of business communication modules it caters to students from specific universities like visvesvaraya technological university sharnbasva university nagpur university and other universities enriched with practical examples it aims to help readers develop essential communication skills for the challenges in the business world valuable for students teachers and anyone looking to enhance their communication skills

Business Communication

2018-04-27

this book is a printed edition of the special issue uav based remote sensing that was published in sensors

UAV-Based Remote Sensing Volume 2

2009-03-16

the only reference book which discusses the usage of nanoprobes for structure determination in an industry where miniaturisation is the main focus designed for newcomers as well as professionals already in the industry

Nanotechnology

1999

this masterly book substantially extends howard raiffa s earlier classic the art and science of negotiation it does so by incorporating three additional supporting strands of inquiry individual decision analysis judgmental decision making and game theory each strand is introduced and used in analyzing negotiations the book starts by considering how analytically minded parties can generate joint gains and distribute them equitably by negotiating with full open truthful exchanges the book then examines models that disengage step by step from that ideal it also shows how a neutral outsider intervenor can help all negotiators by providing joint neutral analysis of their problem although analytical in its approach building from simple hypothetical examples the book can be understood by those with only a high school background in mathematics it therefore will have a broad relevance for both the theory and practice of negotiation analysis as it is applied to disputes that range from those between family members business

partners and business competitors to those involving labor and management environmentalists and developers and nations

Real-time Imaging

2007-03-31

visual effects and motion graphics pros of all stripes from broadcast professionals to vfx supervisors to designers who need to produce occasional video segments will welcome the dramatically accelerated features provided in the brand new after effects cs4 this best selling book has been revised to cover all that s new in this upgrade the ability to import 3d layers from photoshop the cartoon effect that converts live action footage into stylized imagery adobe device central cs4 which lets you preview and test animations for mobile devices and more designed around a single complex project that s broken down into manageable lessons this book mimics a real world workflow but one that readers tackle at their own pace contains all the lesson files and footage readers need to complete the lessons all of peachpit s ebooks contain the same content as the print edition you will find a link in the last few pages of your ebook that directs you to the media files helpful tips if you are able to search the book search for where are the lesson files go to the very last page of the book and scroll backwards you will need a web enabled device or computer in order to access the media files that accompany this ebook entering the url supplied into a computer with web access will allow you to get to the files depending on your device it is possible that your display settings will cut off part of the url to make sure this is not the case try reducing your font size and turning your device to a landscape view this should cause the full url to appear

Negotiation Analysis

2010-04-16

this work covers the impact of computational structural biology on protein structure prediction methods macromolecular function and protein design and key methods in drug discovery it also addresses the computational challenges of experimental approaches in structural biology

Adobe After Effects CS4 Classroom in a Book

2008

proteins lie at the heart of almost all biological processes and have an incredibly wide range of activities central to the function of all proteins is their ability to adopt stably or sometimes transiently structures that allow for interaction with other molecules an understanding of the structure of a protein can therefore lead us to a much improved picture of its molecular function this realisation has been a prime motivation of recent structural genomics projects involving large scale experimental determination of protein structures often those of proteins about which little is known of function these initiatives have in turn stimulated the massive development of novel methods for prediction of protein function from structure since model structures may also take advantage of new function prediction algorithms the first part of the book deals with the various ways in which protein structures may be predicted or inferred including specific treatment of membrane and intrinsically disordered proteins a detailed consideration of current structure based function prediction methodologies forms the second part of this book which concludes with two chapters focusing specifically on case studies designed to illustrate the real world application of these methods with bang up to date texts from world experts and abundant links to publicly available resources this book will be invaluable to anyone who studies proteins and the endlessly fascinating relationship between their structure and function

Computational Structural Biology

2008-12-11

this book constitutes the refereed proceedings of the 14th scandinavian conference on image analysis scia 2005 held in joensuu finland in june 2005 the 124 papers presented together with 6 invited papers were carefully reviewed and selected from 236 submissions the papers are organized in topical sections on image segmentation

and understanding color image processing applications theory medical image processing image compression digitalization of cultural heritage computer vision machine vision and pattern recognition

From Protein Structure to Function with Bioinformatics

2005-06-16

arterial spin labeling asl is an increasingly popular tool to study the brain what sets it apart from other neuroimaging methods is the combination of quantitative measurements of a physiologically well defined process namely perfusion and a completely non invasive acquisition methodology cerebral perfusion is a critical component to brain health as it is the primary means to deliver nutrients to support brain function as well as clearing waste products hence it is a useful quantity to study in disease where changes in perfusion can indicate regions of the brain that are pathological likewise changes in perfusion can be indicative of greater demand for nutrients such as might be required in response to an increase in neuronal activity with the advent of a consensus by the asl community on good practice and a recommendation on robust methods for asl data collection more and more researchers are now able to access and use asl despite the technological advances asl remains a technique with a low signal to noise ratio this makes the wise choice of the appropriate analysis methods more important the aim of this primer is to equip someone new to the field of perfusion imaging and asl with the knowledge not only to make good choices about asl acquisition and analysis but also to understand what choices they are making and why examples of analysis applied to real data are given throughout the text and instructions on how to reproduce the analyses are illustrated on the primer website written to provide a stand alone introduction to perfusion quantification using asl this primer also works with other texts in the oxford neuroimaging primers series to provide a comprehensive overview of the increasingly influential field of neuroimaging

Image Analysis

2018-01-18

this book offers guided access to a collection of algorithms for the digital manipulation and analysis of images written in classic cookbook style it reflects the authors long experience in this field for each task they present a description and implementation of the most suitable procedure in easy to use form the algorithms range from the simplest steps to advanced functions not commonly available for windows users each self contained section treats a single operation describing typical situations requiring that operation and discussing the algorithm and implementation sections start with a header illustrating the nature of the procedure through a before and after pictorial example and a ready reference listing typical applications keywords and related procedures at the end of each section are annotated references and a display of program usage for the c programs on the accompanying cd rom every researcher or practitioner working with images will need this reference and software library

Introduction to Perfusion Quantification using Arterial Spin Labelling

2000-02-13

the classic book on color photography is back in print and completely revamped for a digital photography audience learn from step by step instruction illustrative charts and unbelievably inspirational imagery in this guide meant just for color photographers world renowned artists give you insight as to how they did that and the author provides challenging assignments to help you take photography to a new level with aesthetic and technical instruction like no other this book truly is the bible for color photographers be sure to visit the companion website featuring portfolios and commentary by contemporary artists exploringcolorphotography.com

Practical Algorithms for Image Analysis with CD-ROM

2013-02-11

information extraction ie is a new technology enabling relevant content to be extracted from textual information available electronically ie essentially builds on natural language processing and computational linguistics but it is also closely related to the well established area of information retrieval and involves learning in concert with other promising and emerging information engineering technologies like data mining intelligent data analysis and text summarization ie will play a crucial role for scientists and professionals as well as other end users who have to deal with vast amounts of information for example from the internet as the first book solely devoted to ie it is of relevance to anybody interested in new and emerging trends in information processing technology

Exploring Color Photography Fifth Edition

2005-08-29

this book constitutes the proceedings of the 4th international workshop on predictive intelligence in medicine prime 2021 held in conjunction with miccai 2021 in strasbourg france in october 2021 the 25 papers presented in this volume were carefully reviewed and selected for inclusion in this book the contributions describe new cutting edge predictive models and methods that solve challenging problems in the medical field for a high precision predictive medicine the workshop was held virtually

Information Extraction: A Multidisciplinary Approach to an Emerging Information Technology

2000

vladislav golyanik proposes several new methods for dense non rigid structure from motion nrsfm as well as alignment of point clouds the introduced methods improve the state of the art in various aspects i e in the ability to handle inaccurate point tracks and 3d data with contaminations nrsfm with shape priors obtained on the fly from several unoccluded frames of the sequence and the new gravitational class of methods for point set alignment represent the primary contributions of this book about the author vladislav golyanik is currently a postdoctoral researcher at the max planck institute for informatics in saarbrücken germany the current focus of his research lies on 3d reconstruction and analysis of general deformable scenes 3d reconstruction of human body and matching problems on point sets and graphs he is interested in machine learning both supervised and unsupervised physics based methods as well as new hardware and sensors for computer vision and graphics e g quantum computers and event cameras

2021-09-27

welcome to the proceedings of the 8th european conference on computer vision following a very successful eccv 2002 the response to our call for papers was almost equally strong 555 papers were submitted we accepted 41 papers for oral and 149 papers for poster presentation several innovations were introduced into the review process first the number of program committee members was increased to reduce their review load we managed to assign to program committee members no more than 12 papers second we adopted a paper ranking system program committee members were asked to rank all the papers assigned to them even those that were reviewed by additional reviewers third we allowed authors to respond to the reviews consolidated in a discussion involving the area chair and the reviewers fourth thereports thereviews andtheresponsesweremadeavailabletotheauthorsas well as to the program committee members our aim was to provide the authors with maximal feedback and to let the program committee members know how authors reacted to their reviews and how their reviews were or were not reflected in the final decision finally we reduced the length of reviewed papers from 15 to 12 pages thepreparationofeccv2004wentsmoothlythankstothee ortsofthe ganizing committee the area chairs the program committee and the reviewers we are indebted to anders heyden mads nielsen and henrik j nielsen for passing on eccv traditions and to dominique asselineau from enst tsi who kindly provided his gestrfia conference software we thank jan olof eklundh and andrew zisserman for encouraging us to organize eccv 2004 in prague

Predictive Intelligence in Medicine

2020-06-04

there has been a sea change in how we view genetic recombination when germ cells are produced in higher organisms genetic recombination assures the proper segregation of like chromosomes in the course of that process called meiosis recombination not only assures segregation of one chromosome of each type to progeny germ cells but also further shuffles the genetic deck contributing to the unique inheritance of individuals in a nutshell that is the classical view of recombination we have also known for many years that in bacteria recombination plays a role in horizontal gene transfer and in replication itself the latter by establishing some of the replication forks that are the structural scaffolds for copying dna in recent years however we have become increasingly aware that replication which normally starts without any help from recombination is a vulnerable process that frequently leads to broken dna the enzymes of recombination play a vital role in the repair of those breaks the recombination enzymes can function via several different pathways that mediate the repair of breaks as well as restoration of replication forks that are stalled by other kinds of damage to dna thus to the classical view of recombination as an engine of inheritance we must add the view of recombination as a vital housekeeping function that repairs breaks suffered in the course of replication we have also known for many years that genomic instability including mutations chromosomal rearrangements and aneuploidy is a hallmark of cancer cells although genomic instability has many contributing causes including faulty replication there are many indications that recombination faulty or not contributes to genome instability and cancer as well the nas colloquium links between recombination and replication vital roles of recombination was convened to broaden awareness of this evolving area of research papers generated by this colloquium are published here to encourage the desired interactions of specialists we invited some contributions that deal only with recombination or replication in addition to contributions on the central thesis of functional links between recombination and replication to aid the nonspecialist and specialist alike we open the set of papers with a historical overview by michael cox and we close the set with a commentary on the meeting and the field by andrei kuzminov

Robust Methods for Dense Monocular Non-Rigid 3D Reconstruction and Alignment of Point Clouds

2004-05-10

this book contains the papers presented at the 14th international conference on field programmable logic and applications fpl held during august 30th september 1st 2004 the conference was hosted by the interuniversity micro electronics center imec in leuven belgium the fpl series of conferences was founded in 1991 at oxford university uk and has been held annually since in oxford 3 times vienna prague darmstadt london tallinn glasgow villach belfast montpellier and lisbon it is the largest and oldest conference in reconfigurable computing and brings together academic researchers industry experts users and newcomers in an informal welcoming atmosphere that encourages productive exchange of ideas and knowledge between the delegates the fast and exciting advances in field programmable logic are increasing steadily with more and more application potential and need new ground has been broken in architectures design techniques partial run time reconfiguration and applications of field programmable devices in several different areas many of these recent innovations are reported in this volume the size of the fpl conferences has grown significantly over the years fpl in 2003 saw 216 papers submitted the interest and support for fpl in the programmable logic community continued this year with 285 scientific papers submitted demonstrating a 32 increase when compared to the year before the technical program was assembled from 78 selected regular papers 45 additional short papers and 29 posters resulting in this volume of proceedings the program also included three invited plenary keynote presentations from xilinx gilder technology report and altera and three embedded tutorials from xilinx the universit at karlsruhe th and the university of oslo

Computer Vision - ECCV 2004

1998

in two editions spanning more than a decade the electrical engineering handbook stands as the definitive reference to the multidisciplinary field of electrical engineering our knowledge continues to grow and so does the handbook for the third edition it has expanded into a set of six books carefully focused on a specialized area or field of study electronics power electronics optoelectronics microwaves electromagnetics and radar represents a concise yet definitive collection of key concepts models and equations in

these areas thoughtfully gathered for convenient access electronics power electronics optoelectronics microwaves electromagnetics and radar delves into the fields of electronics integrated circuits power electronics optoelectronics electromagnetics light waves and radar supplying all of the basic information required for a deep understanding of each area it also devotes a section to electrical effects and devices and explores the emerging fields of microlithography and power electronics articles include defining terms references and sources of further information encompassing the work of the world's foremost experts in their respective specialties electronics power electronics optoelectronics microwaves electromagnetics and radar features the latest developments the broadest scope of coverage and new material in emerging areas

Very High Resolution and Quality Imaging

2002-09-18

in recognition of the potential of sport six international partners unesco the olympic foundation for culture and heritage the world anti doping agency agitos foundation the international fair play committee and the international council of sport science and physical education collaborated to create this resource which engages youth through movement based classroom activities while helping teachers instil some of the core values synonymous with sport respect equity and inclusion this toolkit contains for each value practical activity cards to assist teacher in their work with their students

Links Between Recombination and Replication

2004-08-11

the volume comprises of papers presented at the first cadec 2019 conference held at vellore institute of technology andhra pradesh amaravati india the book contains computer simulated results in various areas of electronics and communication engineering such as vlsi and embedded systems wireless communication signal processing power electronics and control theory applications this volume will help researchers and engineers to develop and extend their ideas in upcoming research in electronics and communication

Field Programmable Logic and Application

2018-10-03

while sexual misconduct on our college and university campuses both public and private is dismayingly widespread it continues to be significantly underreported because most victims perceive that judicial recourse with its legalistic adversarial approach fails to address in a healing way the harms done to them fewer still file formal complaints many for fear that they may lose agency and that the process may rekindle the trauma of their experience recognizing the reality that supermajority of sexual harms in higher education are rarely addressed through established legalistic practices this book offers a range of alternative approaches based on restorative justice starting from the premise what if we started with the goal of healing in mind this book opens with an overview of common restorative practices and accounts of application and lessons learned by practitioners who have implemented a range of restorative justice and alternative based approaches subsequent chapters cover procedural elements recommendations around documentation and interventions for individuals who have caused harm through sexual and gender based misconduct the book addresses facilitation the need to pay attention to self people and systems identities and power dynamics the considerations for working restoratively with both complainants and respondents offers cases and adaptable examples of resolution and concludes with reflections on institutional implementation from the perspectives of administrators facilitators and a student survivor recognizing there will always be a need for a formal investigatory approach to cases of sexual misconduct the book offers a wide range of alternative options that empower those who are most directly affected to make the call for themselves in doing so it may increase reporting and furthermore in offering a healing justice that addresses individual and community needs may work to reduce sexual misconduct on campus

Electronics, Power Electronics, Optoelectronics, Microwaves, Electromagnetics, and Radar

2019-12-31

this three volume set Incs 13338 13340 constitutes the thoroughly refereed proceedings of the 8th international conference on artificial intelligence and security icais 2022 which was held in qinghai china in july 2022 the total of 166 papers included in the 3 volumes were carefully reviewed and selected from 1124 submissions the papers present research development and applications in the fields of artificial intelligence and information security

Sport values in every classroom

2019-09-30

physics of fluid flow and transport in unconventional reservoir rocks understanding and predicting fluid flow in hydrocarbon shale and other non conventional reservoir rocks oil and natural gas reservoirs found in shale and other tight and ultra tight porous rocks have become increasingly important sources of energy in both north america and east asia as a result extensive research in recent decades has focused on the mechanisms of fluid transfer within these reservoirs which have complex pore networks at multiple scales continued research into these important energy sources requires detailed knowledge of the emerging theoretical and computational developments in this field following a multidisciplinary approach that combines engineering geosciences and rock physics physics of fluid flow and transport in unconventional reservoir rocks provides both academic and industrial readers with a thorough grounding in this cutting edge area of rock geology combining an explanation of the underlying theories and models with practical applications in the field readers will also find an introduction to the digital modeling of rocks detailed treatment of digital rock physics including decline curve analysis and non darcy flow solutions for difficult to acquire measurements of key petrophysical characteristics such as shale wettability effective permeability stress sensitivity and sweet spots physics of fluid flow and transport in unconventional reservoir rocks is a fundamental resource for academic and industrial researchers in hydrocarbon exploration fluid flow and rock physics as well as professionals in related fields

Computer-Aided Developments: Electronics and Communication

2023-07-03

this book is divided into 5 sections starting with an historic perspective and fundamental aspects on the synthesis and recognition by imprinted polymers the second section contains 8 up to date overview chapters on current approaches to molecular and ion imprinting this is followed by two chapters on new material morphologies and in the last two sections various analytical applications of imprinted polymers are given with the last four chapters devoted to the promising field of imprinted polymers in chemical sensors the authors of this volume have widely different backgrounds mainly polymer chemistry organic chemistry biochemistry and analytical chemistry which means that this book has an interdisciplinary character and should appeal to a broad audience

Applying Restorative Justice to Campus Sexual Misconduct

2022-07-04

this book describes the advanced developments in methodology and applications of nmr spectroscopy to life science and materials science experts who are leaders in the development of new methods and applications of life and material sciences have contributed an exciting range of topics that cover recent advances in structural determination of biological and material molecules dynamic aspects of biological and material molecules and development of novel nmr techniques including resolution and sensitivity enhancement first this book particularly emphasizes the experimental details for new researchers to use nmr spectroscopy and pick up the potentials of nmr spectroscopy second the book is designed for those who are involved in either developing the technique or expanding the nmr application fields by applying them to specific samples third the nuclear magnetic resonance society of japan has organized this book not only for nmr members of japan but also for readers worldwide who are interested

in using nmr spectroscopy extensively

Artificial Intelligence and Security

2023-04-13

updated to cover the latest program version this comprehensive guide helps users make the most of filemaker pro the sophisticated workgroup database application with nine million registered users offers complete step by step guidance on filemaker pro features and tasks covering both the mac and windows versions features expanded coverage of odbc jdbc and xml connectivity and includes a new chapter on the developer tools used to create more complex databases other topics covered include calculations and computations data exchange creating and using templates linking databases using filemaker in workgroups publishing plug ins and advanced database connectivity

Physics of Fluid Flow and Transport in Unconventional Reservoir Rocks

2000-12-22

iau symposium 268 presents an overview of the most recent observational and theoretical research on the formation and evolution of light elements in the universe h he li be b and their isotopes astrophysicists from a variety of subfields discuss recent developments that will improve our understanding of the light elements and provide important clues to stellar and galactic evolution big bang nucleosynthesis and cosmology striking observational progress has been achieved recently through the advent of next generation ground and space based telescopes such as the cosmic microwave background experiments that allow the accurate determination of the baryon density of the universe new theoretical breakthroughs in describing stellar interiors and the chemical evolution of complex systems and the remaining challenges in this field are also addressed this critical review is a useful resource for all those interested in the chemical evolution of the universe

Molecularly Imprinted Polymers

2017-11-23

this book constitutes the refereed proceedings of the third international conference on audio and video based biometric person authentication avbpa 2001 held in halmstad sweden in june 2001 the 51 revised papers presented together with three invited papers were carefully reviewed and selected for inclusion in the book the papers are organized in topical sections on face as biometrics face image processing speech as biometrics and speech processing fingerprints as biometrics gait as biometrics and hand signature and iris as biometrics

Experimental Approaches of NMR Spectroscopy

2004-09-27

this book provides a comprehensive up to date overview of clinical and research aspects of cardiac repolarization geared toward practicing cardiologists and physicians it analyzes elements of pathophysiology and molecular biology as they relate to the clinical aspects of cardiac repolarization long qt syndromes early repolarization syndromes and special cardiac repolarization syndromes each chapter examines different aspects of the field with basic and clinical overviews and highlights the impact on medical management the book covers a variety of repolarization topics including the influence of the autonomic system racial and gender differences in patients the future role of stem cells inflammation and autoimmunity and cardiovascular risk cardiac repolarization basic science and clinical management is an essential resource for physicians and related professionals residents fellows and graduate students in cardiology clinical cardiac electrophysiology internal medicine and cardiovascular biology

FileMaker Pro 7 Bible

2010-05-13

this volume contains papers presented at the 20th international conference on genome informatics giw 2009 held at the pacifico yokohama japan from december 14 to 16 2009 the giw series provides an international forum for the presentation and discussion of original research papers on all aspects of bioinformatics computational biology and systems biology its scope includes biological sequence analysis protein structure prediction genetic regulatory networks bioinformatic algorithms comparative genomics and biomolecular data integration and analysis boasting a history of 20 years giw is the longest running international bioinformatics conference a total of 18 contributed papers were selected for presentation at giw 2009 and for inclusion in this book in addition this book contains abstracts from the five invited speakers sean eddy hhmi s janelia farm usa minoru kanehisa kyoto university japan sang yup lee kaist korea hideyuki okano keio university japan and mark ragan university of queensland australia a
