1-2-3 Tips, Tricks, and Traps 1988 math skills you can count on in this eagerly awaited sequel to the popular rapid math tricks and tips professor ed julius shows you how to master difficult problems in addition subtraction multiplication and division quickly easily and without a calculator and have fun while doing it by learning one to two tricks a day for thirty days you ll be amazed at the increase in your number power discover how you can quickly subtract by over subtracting speed up your calculating with place value multiplication see how to add in seconds by breaking a number apart more rapid math tricks and tips includes step by step examples to explain each technique over 1 400 sample problems and practice exercises challenging brain builders to keep you on your toes weekly quizzes and a final exam so you can check your progress fascinating mathematical curiosities and parlor tricks such as the amazing age divining trick and the phenomenal fifth root trick whether calculating the total at the supermarket checkout reconciling a bank statement or figuring the sales tax on your latest purchase more rapid math tricks and tips makes working with numbers fast fun and easy it s a must for math lovers as well as students teachers and anyone who works with numbers on a regular basis ed julius has written another engaging book that will definitely excite the mind mick horwitz founding director sierra canyon college preparatory school the original rapid math tricks and tips has been a staple in my classroom for the past four years the sequel is definitely another winner laurie curtis abbe teacher anacapa middle school a california national school of excellence a u s department of education blue ribbon exemplary school

Dude Perfect 101 Tricks, Tips, and Cool Stuff 2021-06-22 use these hydroponic gardening tips and tricks to build your own garden efficiently this book contains proven steps and strategies on how to grow your own healthy vegetables and fruits there are few things more fulfilling than eating food you have grown and yet each year many people miss this opportunity simply because they don t have suitable soil or land to grow their own produce however there are ways of getting over this hurdle thanks to a system of gardening which does not require the use of soil a hydroponic system is one such system hydroponics refers to a form of gardening that does not use soil instead of growing your crops in soil you grow them in a solution made of nutrients and water think about it plants just like human beings need nutrients in order to grow soil houses such nutrients this is why we plant our crops in soil but as you know not all soil is created equal some types of soil are deficient in nutrients and this results in poor yields in addition as stated before many people do not have access to land in the first place this puts them at a disadvantage when it comes to growing their crops some amazing benefits of hydroponic gardening include faster plant growth plants grown in a hydroponic system tend to grow at least 20 percent faster than those grown in soil better yields you can expect 20 to 25 percent more yield when you adopt hydroponic gardening less water less water is needed simply because hydroponic systems are enclosed and thus the plants get the water they need instead of such water being distributed to the surrounding environment less space because the plants have easier access to nutrients when they are grown in a hydroponic system they do not need to grow deep roots or spread them widely in search of nutrients thus you will be able to grow

your plants more closely and thus grow more plants in a smaller space more freedom to grow your crops the best thing about hydroponic gardening is that it gives more people the opportunity to grow plants regardless of where they live you can easily grow crops indoors even if you live in an apartment no need of soil with hydroponic gardening you don't use soil instead you use what is known as grow medium to house or hold the plants this is less messy and easier to control than soil before you can enjoy the above amazing benefits of opting for hydroponics to grow fruits and vegetables you will first need to learn how to grow plants using this step the first thing you need to do is to select a hydroponic system that will allow you to comfortably grow your vegetables and fruits here is a preview of what you will learn what is hydroponic gardening which hydroponic system should i use which medium should i choose what about hydroponic nutrients and ph choose a light source and much much more take action now and get this kindle book for only 0 99

More Rapid Math: Tricks and Tips 1996-03-13 netbeans is not only a great ide and platform it is also a community of programming enthusiasts 100 netbeans tm ide tips and tricks is a collection of the best technical tips for the netbeans ide collected from community blogs forums netbeans evangelists and the author s personal experience it focuses on specific recipes that can make you more productive in your routine development tasks and provides answers to your most pressing questions the default software version for these tips is netbeans ide 6 0 when a feature is specific to another version it is called out the default platform is microsoft windows mac os keyboard shortcuts are noted in parentheses
