la comicità di aldo palazzeschi non è certo scollegata dalle ragioni della storia anzi deriva da una pensosa riflessione sulle insensatezze del mondo lo ha dimostrato nel 1920 con il manifesto pacifista due imperi mancati e lo ha ribadito nel 1945 con tre imperi mancati personalissima cronaca degli anni del fascismo e della guerra nella capitale il libro è il racconto di illusioni o meglio di colpevoli velleità giustamente cadute un insieme di vivide istantanee sui vizi eterni del popolo italiano la denuncia lucida delle responsabilità di un intera nazione il tutto descritto con uno stile farsesco più che mai adeguato a dipingere una realtà politica buffonesca nel suo essere tragica ma tre imperi mancati è anche il canto dolente di chi ha creduto nella sacralità della vita e nella forza della bellezza della tolleranza della civiltà tra gli imperi mancati c è anche quello della poesia e le ha viste miseramente crollare intorno a sé È come lo definì gadda la testimonianza del suo dolore il libro sofferto di un grande scrittore

this book aims to shed light on the roots of sustainability in the iberian peninsula that lie in the interrelations between shipbuilding and forestry from the 14th to the 19th centuries combining various geographical scales local regional and national and different timespans short term and long term studies three main themes are discussed in depth here firstly the roots of current conservationism in the iberian peninsula the evolution of the forest policies set in motion at the local regional and national levels to meet the demand for wood and timber and the long standing impact of naval empirical forestry on the conservation and transformation of the forest landscape therefore the book attempts on the one hand to unravel the forest policies and empirical forestry implemented in the iberian peninsula as the roots or origins of what we refer to nowadays as sustainability and to assess the contribution of imperial forestry to landscape planning and the conservation of forest resources on the other and finally to break away from the prevailing theological narrative that shipbuilding was the main agent of forest destruction in the early modern iberian peninsula for which both quantitative and qualitative analyses will be conducted this book could be of maximum interest to environmental and social historians and researchers and anyone devoted to conducting research on the emergence and evolution of the concept of sustainability with respect to the governance and the historical transformation of woodlands around the world

many of the most significant studies devoted to ambrogio spinola have focused on one particular aspect of his life his successful military career this volume through its interdisciplinary and cultural approach breaks open this all too narrow perspective and expands our understanding of spinola and his world as a great military strategist and catholic knight entrepreneur in the international finance market courtier and diplomat spinola was certainly a genoese but he was also a member of the transnational iberian elite to which he linked his fate

and that of his children his life s journey between italy flanders and spain and the reinterpretations of his life by his contemporaries in art literature and the press give us the opportunity to reflect on the multiple identities and the physical and mental wanderings of many europeans of the early modern age ambrogio spinola offers an example of humanity that is impossible to capture in a single reading and is much more contemporary than we can imagine ambrogio spinola between genoa flanders and spain allows the reader to better understand not only his military activities but also and above all the family social and political foundations of his successful career as well as the various forms of art and communication literature architecture paintings sculptures engravings newspapers etc which were used to celebrate him both during his life and beyond

this book explores the idea of privacy at sea from early sixteenth

century maritime expansions to nineteenth century naval developments in this period the sea became a focal point of political and economic ambition as technological and cultural shifts enabled a more extensive exploration of maritime spaces and global coexistence at sea the exploration of the sea and the conflicts arising from establishing control over maritime routes demanded a more nuanced distinction and negotiation between state and private efforts privateering for example became a bridge between the private enterprises and the state s warfares or trade struggles demonstrating that the sea required public control at the same time as it enabled private endeavours although this tension between private and public interests has been explored in military and economic studies questions of how the private appeared in maritime history have been discussed only through a particularly merchantile lens this volume adds a new dimension to this discussion by focusing on how privacy and the private were perceived and created by the historical agents at sea we aim to move beyond the mercantile private as a direct opposite to the public or the state thereby opening the discussion of privacy at sea as a multiplicity of lived experiences chapters 1 8 and 14 are available open access under a creative commons attribution 4 0 international license via link springer com

this interdisciplinary volume explores core emerging themes in the study of early modern literary diplomatic relations developing essential methods of analysis and theoretical approaches that will shape future research in the field contributions focus on three intimately related areas the impact of diplomatic protocol on literary production the role of texts in diplomatic practice particularly those that operated as textual ambassadors and the impact of changes in the literary sphere on diplomatic culture the literary sphere held such a central place because it gave diplomats the tools to negotiate the pervasive ambiguities of diplomacy simultaneously literary depictions of diplomacy and international law provided genre shaped places for cultural reflection on the rapidly changing and expanding diplomatic sphere translations exemplify the potential of literary texts both to provoke competition and to promote cultural convergence between political communities revealing the existence of diplomatic third spaces in which ritual symbolic or written conventions and semantics converged despite particular oppositions and differences the increasing public consumption of diplomatic material in europe illuminates diplomatic and literary communities and exposes the translocal as well as the transnational geographies of literary diplomatic exchanges diplomatic texts possessed

symbolic capital they were produced archived and even redeployed in creative tension with the social and ceremonial worlds that produced them appreciating the generic conventions of specific types of diplomatic texts can radically reshape our interpretation of diplomatic encounters just as exploring the afterlives of diplomatic records can transform our appreciation of the histories and literatures they inspired

how have artists across the millennia responded to warfare in this uniquely wide ranging book theodore rabb blends military history and the history of art to search for the answers he draws our attention to masterpieces from the ancient world to the twentieth century paintings sculpture ceramics textiles engravings architecture and photographs and documents the evolving nature of warfare as artists have perceived it the selected works represent landmarks in the history of art and are drawn mainly from the western tradition though important examples from japan india and the middle east are also brought into the discussion together these works tell a story of long centuries during which warfare inspired admiration and celebration yet a shift toward criticism and condemnation emerged in the renaissance and by the end of the nineteenth century glorification of the warrior by leading artists had ceased rabb traces this progression from such works as the column of trajan and the titian battle of lepanto whose makers celebrated glorious victories to the antiwar depictions created by brueghel goya picasso and others richly illustrated and accessibly written this book presents a study of unprecedented sweep and multidisciplinary interest book jacket
