Agrarian Capitalism in Theory and Practice 2017-10-10

susan mann focuses on a longstanding controversy in sociological theory why has agriculture been traditionally resistant to wage labor capitalist development has been slower and more uneven in agriculture than in other spheres of production and major parts of the rural economy remain almost preindustrial in their reliance on family labor lack of separation between industry and household and failure to

develop a highly specialized division of labor emphasizing the agriculture of the american south mann adopts an interdisciplinary approach drawing insights from history and economics as well as sociology mann points out that most theories of agrarian capitalism both marxist and non marxist ignore the implications of agriculture as a production process centered in nature with natural features that cannot be synchronized easily into the tempos required by industrial production she argues that various natural and technical features of agricultural production such as the relatively lengthy production time of certain crops and the irregular labor requirements imposed by seasonal production make some types of farming particularly risky avenues for capitalist investment to test this pioneering theory of natural obstacles to rural capitalist development mann creatively combines diverse research methodologies analyzing u s agricultural census data she shows the correlations between type of agricultural commodity or crop produced the natural and technical features of these rural commodities and the use of wage labor using an historical comparative approach she investigates the persistence of nonwage labor in american cotton production after the civil war she examines why sharecropping rather than wage labor replaced slavery in the older cotton producing regions of the southeastern united states she then discusses the domestic and international factors that finally led to the demise of sharecropping and the rise of wage labor in the decades following the great depression in this historical study of the rise and demise of sharecropping the interplay between nature gender race and class is highlighted by closely examining both natural and social obstacles to wage labor within the context of a global economy mann presents not only an intriguing analysis of agrarian capitalist development but also an entirely new framework for examining the social history of the american south originally published in 1990 a unc press enduring edition unc press enduring editions use the latest in digital technology to make available again books from our distinguished backlist that were previously out of print these editions are published unaltered from the original and are presented in affordable paperback formats bringing readers both historical and cultural value

Theories of Agricultural Finance 1988

in a time of great agricultural and rural change the notion of multifunctionality has remained under theorized and poorly linked to the debates in the social sciences this book analyses the extent to which the proposed transition towards post productivist agriculture holds up to scientific scrutiny and proposes a new transition theory

A.V. Chayanov on the Theory of Peasant Economy 1991

the thesis discusses different theories about agricultural growth and their applicability in sub saharan africa starting in a debate about lack of

expected results from economic reform programmes the study goes on to describe the situation prevailing on the mossi plateau of central burkina faso this area has been selected as a case where agricultural reforms have been implemented properly and hence positive results from liberalisation in terms of agricultural growth should be expected in spite of this what is found is an increasing level of income diversification combined with the upholding of self subsistence farming with traditional methods the factor explaining the prevalence of income diversification is the level of reluctance to change underlying this reluctance to change are four indigenous institutions the upholding of social relationships the household as the basic production unit customary land tenure and the upholding of local power structures these four institutions are also found to influence the level of economic dynamism more broadly hence they determine the scope for agricultural growth however some growth is taking place first and foremost in the fields of vegetable gardening cotton cultivation and cattle breeding in these areas change is possible because it can take place without challenging the identity of mossi peasantries some members of households are also able to be more dynamic than others since they have roles that are freer the indigenous institutions that guide mossi economic behaviour are rules that are constitutive that is the upholding of them contribute to create meaning for those who follow them in this they way they belong to logic of appropriateness based on these findings neoclassic as well as new institutional economic theories are criticised as are other theories that indirectly make the assumption that agricultural growth is hindered or held back by an irrelevant institutional pattern in order to make sense theories about agricultural growth in sub saharan africa need to take indigenous institutions into consideration and give them a proper role

Multifunctional Agriculture 2016-05-13

excerpt from an encyclopaedia of agriculture comprising the theory and practice of the valuation transfer laying out improvement and management of landed property the greater part of the article on the horse p 949 and the veterinary part of the subsequent articles on

agricultural and domestic animals about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

On-farm Research in Theory and Practice 1995

this book brings together a series of chapters that provides updated information on adaptation practices against climate change in agriculture and livestock information on some new aspects like conservation of carnivorous plants climate smart millets production advances in genomic interventions for climate resilient crops perceptions on disease and pests under changing climate role of neglected crops in climate resilient agriculture nanotechnology in sustainable agriculture use of crop wild relatives for developing climate resilient crops have been discussed it also presents detailed information carbon sequestration practices and green consumption behaviour for sustainable development the last chapter of book mentions about an innovative agronomic technique under rainfed conditions for sustainable yield advantage in soybean crop

Imagining Sustainable Food Systems 1998

this report is a compilation of selected references concerning agricultural rents in the united states and great britain the primary intent of the bibliography is to serve as an information reservoir for those who may have use for material pertaining to rent in theory and in practice such

information may provide a valuable guide for further research on rent and facilitate the exchange of ideas among researchers it should also provide a basis of study that have been made over the last two centuries no other such bibliography was found to exist

Selection, Testing and Evaluation of Agricultural Machines and Equipment 1982

an approach to farming the natural way the theory and practice of working with nature and living better for it

The Right to Food 2004

government subsidized crop insurance has been used by a number of developed countries as a mechanism to reduce farm income instability by reducing yield risks economics of agricultural crop insurance theory and evidence provides an in depth analysis and evaluation of government provided crop insurance in developed countries
