questions was designed whereby their degree of difficulty exceeds the knowledge of an average student by far it was investigated whether subjects n 535 would

acknowledge this condition and its associated nescience if that is the case they will answer the 10 questions within an extremely wide confidence interval in order to meet the predefined 90 accuracy requirement the focus of investigation was in southern germany as the school system regularly receives top marks in national educational rankings in addition to the empirical study the paper defines the distortion of judgment and identifies its relevant factors it gives a detailed explanation of the german education system and states the criticism of the concept of overconfidence the paper concludes with a recommendation for action and ventures a look ahead the main intention of the study is to identify a possible factor which influences human behavior towards a biased decision making process it is crucial to understand all relevant factors in order to take actions against the negative effects of overconfidence dieser band enthält zehn aktuelle beiträge zur schweizer destroyed and degraded at an alarming rate this much needed publication which includes contributions from leading researchers and practitioners presents a holistic perspective on the restoration of wetland ecosystems such as shallow lakes streams floodplains and bogs through the use of carefully chosen case studies the authors examine european wetland restoration projects from scandinavia to bulgaria and from ireland to belarus focusing on the lessons they can teach to a new generation of conservationists as well as reviewing the sum of current knowledge on the subject the text is a store of practical know how covering a wide range of conservation approaches and techniques it analyzes the major problems in the field and identifies key principles for achieving sustainability in wetland restoration the topics covered include the role of wetlands in landscape functioning human interference with natural processes such as water and matter cycles and energy dissipation the impact of land use on global problems such as climate change floods and droughts the role played by diversity in wetland functioning the work shows that without sustainable land use over the totality of their catchment areas and without cohesive inter agency cooperation individual restoration projects will have a short life span the balance between scientific background and practical restoration makes this book a valuable resource for scientists as well as wetland managers decision makers and land use planners as well as students of ecology nature conservation and environmental protection 书名：湿地恢复：欧洲经验与实践 作者：[编著者姓名] 出版社：[出版社名称] 出版时间：[出版年份] 页数：[页数] 语种：[语言] ISBN：[ISBN号] the most crucial task facing christian theology today is the furtherance of dialogue with the religious traditions of the world great and small and with the scientific worldview the starting premise of this book is that the two dialogues need to be carried on

simultaneously and equiprimordially despite the risk of undermining the traditional foundations of the christian faith the author argues that such a crisis can be averted by breaking through its core and opening faith to an experience of nothingness he draws on the buddhist philosophy of the kyoto school philosopher nishitani keiji to propose new paths toward a theology of religious pluralism grounded in a huayan buddhist vision of reality this monograph offers an innovative understanding of the mechanisms involved in romance optional wh in situ new supporting evidence in favour of cable s 2010 grammar of q is presented as well as novel implementations of his original theory in particular it is claimed that wh in situ idioms are characterised not only by language specific choices between q projection and q adjunction and between overt and covert movement of q but also in terms of the locus where they check the features relevant to wh questions while some languages check both q and focus in c others make use of the clause internal vp periphery to check focus thanks to the vast amount of data presented and discussed along with the predictions and theoretical contributions made this monograph will be of interest to a wide range of specialists in human language from typologists to romance specialists and formal syntacticians but also to the many experts in languages with overt q particles who wonder why romance specialists have long been so resistant to the implementation of silent q particles in their theoretical models although standardly recognized by linguists of many diverse theoretical persuasions finiteness continues to figure among the most poorly understood concepts of linguistic theory this was eloquently stated by ledgeway 2000 2007 and remains true even today the present volume thus aims to shed some much needed light on this area of linguistic theorizing with eleven chapters approaching finiteness phenomena from the fields of syntax semantics language acquisition and creole studies and providing data from a range of different languages traditionally approaches to finiteness within the principles and parameters framework have seen as their main aim to understand the relation between the morphological exponents of finiteness and the syntactic operations seemingly depending on these exponents the papers in this volume mostly take their point of departure from this more traditional view on finiteness before elaborating on modifying and diverging from this tradition in novel and interesting ways presents case studies of social insurance in the beijing experimental zone of new technology industry development social security regulations and reform of pension insurance in hainan province and social change and social security in taiwan covers trends from 1979 to 1994 and give projections up to 2050 a practical guide on how to select organise and teach vocabulary to students of all levels linguistic cycles are ever present in language change and involve a phrase or word that gradually disappears and is replaced by a new linguistic item the most well known cycles involve negatives where an initial single negative such as not is reinforced by another negative such as no thing and subjects where full pronouns are reanalyzed as endings on the verb this book presents new data and insights on the well known cyclical changes as well as on less well known ones such as the preposition auxiliary copula modal and complementation cycles part i covers the negative cycle with chapters looking in great detail at the steps that are typical in this cycle part ii focuses on pronouns auxiliaries and the left periphery part iii includes work on modals prepositions and complementation the book ends with a psycholinguistic chapter this book brings together linguists from a variety of theoretical frameworks and contributes to new directions in work on language change comparative analysis of the 2011 arab spring uprisings how do we make sense of the arab revolution of 2011 what were its successes its failures and significance in world history the arab revolution of 2011 brings together a broad range of perspectives to explain the causes processes and consequences of the revolution of 2011 and its critical implications for the future the contributors in this major addition to the sociology of revolutions step back from the earlier euphoria of the arab spring to provide a sober analysis of what is still an ongoing process of upheaval in the middle east the essays address the role of national armies and foreign military intervention the character and structure of old regimes as determinants of peaceful or violent political transformation the constitutional placement of islam in post revolutionary regimes and the possibilities of supplanting authoritarianism with democracy the revolution of 2011 is also examined within a broad historical perspective comparing the dynamics of revolution and counterrevolution in countries such as tunisia egypt and libya with such epochal events as the european revolution of 1848 and russia in 1917 said amir arjomand is distinguished service professor of sociology and director of the stony brook institute for global studies at stony brook university state university of new york he is the author and editor of many books including social theory and regional studies in the global age and with nathan j brown the rule of law islam and constitutional politics in egypt and iran both also published by suny press 10 15 20 20
