the lloyd s register of shipping records the details of merchant vessels over 100 gross tonnes which are self propelled and sea going regardless of classification before the time only those vessels classed by lloyd s register were listed vessels are listed alphabetically by their current name this exhibition is the tenth commission in the unilever series an annual art commission with the break up of the spanish empire in south america the continent split into nine independent states with often ill defined boundaries one of these was that between bolivia and chile which were separated by the atacama desert one of the driest regions in the world when it was realized that the area contained nitrates that the world needed for explosives and fertilizer the scene was set for the inevitable clash when war broke out in february 1879 both sides found themselves unprepared for war rapid armament followed as the peruvians were dragged into the conflict in support of their bolivian allies initially there was a tiresome naval war of blockade and guerre de course two naval actions decided the naval campaign in favor of the chileans who then proceeded to use their naval power to attack the allies isolated armies and capture lima two years after war had broken out fighting then developed into a cruel and ruthless guerrilla war in the andes sometimes even pitting peruvian against peruvian before the peruvians finally concede defeat the war was notable in the west for fights involving ironclads particularly the battle of angamos which saw the only time ironclads were pitted against each other between the battle of lissa and the battle of the yalu river the war helped formulate captain mahan s thoughts in the influence of sea power upon history the land war was more or less ignored abroad although it included some of the biggest battles ever fought on the continent using all the latest technology including breech loading rifles and cannons and machine guns the armies on both sides initially lacked experience and training as well as modern equipment the bolivian army started the war with 806 officers and only 1369 other ranks in the end the chileans won because of their more stable government better financial situation and their control of the sea due to their two superior ironclads from the atacama to the andes tells the brutal struggle between two sides to control the wealth of the atacama and for retention of bolivia s coast the result was that chile gained the mineral resources of the new north and bolivia became the second landlocked country on the continent paving the way for the even more catastrophic chaco war 50 years later from his provincial origins in the small northern mexico town of múzquiz coahuila to his meteoric rise in manhattan s east village art scene to having achieved international standing at the time of his early death at forty seven julio galán was radically transgressive the artist extended contemporary mexican painting beyond the cultural criticism of neo mexicanism neomexicanismo redefining mexican identity as gender expansive in his art galán combined gender fluid imagery his performative persona queer self representation and cross cultural visual and textual references to create large scale layered dialogical visual puzzles an artist ahead of his time galán s content and imagery is relevant to contemporary lgbtq social movements replete with full color reproductions of galán s artwork and photographic material teresa eckmann s book serves as the first english language monograph on the artist s life and work anyone interested in art in mexico and latin america will find this book an indispensable addition to their library and it will be a core book on the study of this artist for decades to come written entries on each artist offer key biographical and descriptive information and accompanying essays by leading critics art historians and scholars offer new perspectives on feminist art practice the topics provide a broad social context for the artworks themselves the lloyd s register of shipping records the details of merchant vessels over 100 gross tonnes which are self propelled and sea going regardless of classification before the time only those vessels classed by lloyd s register were listed vessels are listed alphabetically by their current name the time has come for a new in depth encyclopedic collection of articles defining the current state of deaf studies at an international level and using the critical and intersectional lens encompassing the field the emergence of deaf studies programs at colleges and universities and the broadened knowledge of social sciences including but not limited to deaf history deaf culture signed languages deaf bilingual education deaf art and more have served to expand the activities of research teaching analysis and curriculum development the field has experienced a major shift due to increasing awareness of deaf studies research since the mid 1960s the field has been further influenced by the deaf community s movement resistance activism and politics worldwide as well as the impact of technological advances such as in communications with cell phones computers and other devices a major goal of this new encyclopedia is to shift focus away from the medical pathological model that would view deaf individuals as needing to be fixed in order to correct hearing and speaking deficiencies for the sole purpose of assimilating into mainstream society by contrast the deaf studies encyclopedia seeks to carve out a new and critical perspective on deaf studies with the focus that the deaf are not a people with a disability to be treated and cured medically but rather are members of a distinct cultural group with a distinct and vibrant community and way of being
