the essential guide by one of america s leading doctors to how digital technology enables all of us to take charge of our health a trip to the doctor is almost a guarantee of misery you ll make an appointment months in advance you ll probably wait for several hours until you hear the doctor will see you now but only for fifteen minutes then you ll wait even longer for lab tests the results of which you ll likely never see unless they indicate further and more invasive tests most of which will probably prove unnecessary much like physicals themselves and your bill will be astronomical in the patient will see you now eric topol one of the nation s top physicians shows why medicine does not have to be that way instead you could use your smartphone to get rapid test results from one drop of blood monitor your vital signs both day and night and use an artificially intelligent algorithm to receive a diagnosis without having to see a doctor all at a small fraction of the cost imposed by our modern healthcare system the change is powered by what topol calls medicine s gutenber moment much as the printing press took learning out of the hands of a priestly class the mobile internet is doing the same for medicine giving us unprecedented control over our healthcare with smartphones in hand we are no longer beholden to an impersonal and paternalistic system in which doctor knows best medicine has been digitized topol argues now it will be democratized computers will replace physicians for many diagnostic tasks citizen science will give rise to citizen medicine and enormous data sets will give us new means to attack conditions that have long been incurable massive open online medicine where diagnostics are done by facebook like comparisons of medical profiles will enable real time real world research on massive populations there s no doubt the path forward will be complicated the medical establishment will resist these changes and digitized medicine inevitably raises serious issues surrounding privacy nevertheless the result better cheaper and more human health care will be worth it provocative and engrossing the patient will see you now is essential reading for anyone who thinks they deserve better health care that is for all of us

2017-01-03

we confess that the first part of our title is somewhat of a misnomer bayesian reasoning is a normative approach to probabilistic belief revision and as such it is in need of no improvement rather it is the typical individual whose reasoning and judgments often fall short of the bayesian ideal who is the focus of improvement what have we learnt from over a half century of research and theory on this topic that could explain why people are often non bayesian can bayesian reasoning be facilitated and if so why these are the questions that motivate this frontiers in psychology research topic bayes theorem named after english statistician philosopher and presbyterian minister thomas bayes offers a method for updating one's prior probability of an hypothesis h on the basis of new data d such that $p(h|d) = \frac{p(d|h)p(h)}{p(d)}$ the first wave of psychological research pioneered by ward edwards revealed that people were overly conservative in updating their posterior probabilities i.e. $p(h|d) < \frac{p(d|h)p(h)}{p(d)}$ a second wave spearheaded by daniel kahneman and amos tversky showed that people often ignored prior probabilities or base rates where the priors had a frequentist interpretation and hence were not bayesians at all in the 1990s a third wave of research spurred by leda cosmides and john tooby and by gerd gigerenzer and ulrich hofrage showed that people can reason more like a bayesian if only the information provided takes the form of non relativized natural frequencies although kahneman and tversky had already noted the advantages of frequency representations it was the third wave scholars who pushed the prescriptive agenda arguing that there are feasible and effective methods for improving belief revision most scholars now agree that natural frequency representations do facilitate bayesian reasoning however they do not agree on why this is so the original third wave scholars favor an evolutionary account that posits human brain adaptation to natural frequency processing but almost as soon as this view was proposed other scholars challenged it arguing that such

evolutionary assumptions were not needed the dominant opposing view has been that the benefit of natural frequencies is mainly due to the fact that such representations make the nested set relations perfectly transparent thus people can more easily see what information they need to focus on and how to simply combine it this research topic aims to take stock of where we are at present are we in a proto fourth wave if so does it offer a synthesis of recent theoretical disagreements the second part of the title orients the reader to the two main subtopics what works and why in terms of the first subtopic we seek contributions that advance understanding of how to improve people's abilities to revise their beliefs and to integrate probabilistic information effectively the second subtopic centers on explaining why methods that improve non bayesian reasoning work as well as they do in addressing that issue we welcome both critical analyses of existing theories as well as fresh perspectives for both subtopics we welcome the full range of manuscript types

Improving Bayesian Reasoning: What Works and Why?

2016-02-02

the development of memory in infancy and childhood provides a thorough update and expansion of the previous edition and offers new research on significant themes and ideas that have emerged in the past decade such as the cognitive neuroscience of memory development autobiographical memory and infantile amnesia and the cognitive and social factors that underlie memory for events in this volume courage and cowan bring together leading international experts to review the current state of the science of memory development in their own research areas they note questions of theory and basic science addressed in their research highlight the real world applications of those findings and propose an agenda for future research the book also considers the implications of their work for the development of atypical children specifically how these new findings might be adapted to enrich the lives of those children and to inform and validate our current expectations of individual differences in the development of typical children the first of three groups of chapters focuses on basic neurobiological perceptual and cognitive processes that underlie memory and its development i e encoding consolidation and storage retrieval the second group focuses primarily on the social contextual and cultural factors that enable shape and mediate these basic

processes while the rest of the chapters focus on practical applications of this knowledge to real world settings and issues the book provides a new look at memory development including new topics such as spatial representation and spatial working prospective memory false memories and memory and culture this classic yet contemporary volume will appeal to senior undergraduate and graduate students of developmental and cognitive psychology as well as to developmental psychologists who want a compendium of key topics in memory development

Medical Surgical Nursing, Microbiology - 2023

this volume aims to stimulate interest in the under researched role of silent partners sps in multicultural education silent partners include formal and informal places spaces in schools e g architecture classroom facilities libraries corridors playgrounds canteens objects e g teaching aids furniture wall decorations and overall interior design interactive technologies use of devices and applications but also often taken for granted and not immediately visible patterns of thought ideologies and assumptions people involved in education all engage and work with a number of sps that contribute to the delivery of curricula but also to social life and well being in and out of schools the way places spaces objects and technologies influence the school community s experiences of learning well being and social justice is rarely observed and problematised in education hence the adjective silent in the term silent partners this book not only fills a significant empirical gap but it can also inject public debate over future working environments in schools for multicultural education it will be relevant to both researchers interested in developing their knowledge on these issues from a different perspective but also educators in search of inspiration for multicultural education praise for silent partners in multicultural education how to organize your classroom s configuration in such a manner that all pupils feel welcome and comfortable while most of those invested in multicultural education focus on the optimization of various linguistic aspects itkonen dervin and their colleagues give voice to the non verbal aspects of education in this book they elaborate how formal and informal places spaces in schools can unintentionally reflect ideologies and cultural assumptions they illustrate this perspective with telling examples that come from what is widely perceived as one of the best educational systems in the world this book is an important innovative contribution to the question of inclusion of all pupils in our school systems it provides an eye opening perspective to researchers in the field teachers principals and stakeholders willing to work for social justice in their schools emmanuelle le pichon vorstman researcher and assistant professor languages literature and communication department utrecht institute of linguistics congratulations are in order for this ground breaking and significant book as the editors and authors convey convincingly and often poignantly multicultural education is an increasingly politicised phenomenon that needs all the friends and allies that it can garner the book s coverage of silent partners in education objects and technologies operating in specific places and spaces is therefore timely yet as the book also highlights these silent partners can exert negative power as well as positive influence on educational outcomes the book presents a compelling account of the fundamental ambivalence framing these partners and formal educational provision more broadly rendering these silent educational partners visible and open to scrutiny is a significant scholarly achievement by the education for diversities research group in the department of teacher education at the university of helsinki finland building on their well deserved reputation for exploring the implicit and tacit and yet impactful dimensions of intercultural education and understanding the book is appropriately diverse and inclusive in its concerns with

attention being directed at education in finland france and the united states likewise the coverage traverses international and national schools higher education teacher education and productive methodologies for researching silent partners this innovative and thought provoking volume is highly recommended for its originality in helping us to see education for diversities in a new and powerful light patrick alan danaher professor in educational research in the school of linguistics adult and specialist education associate dean research and research training in the faculty of business education law and arts toowoomba campus of the university of southern queensland australia adjunct professor in the school of education and the arts central queensland university australia silent partners do not only reflect the ways we conceive of education but they also influence our practices as educators being silent they are often taken for granted the strength of this book lies in its critical questioning of the notion of silent partners the chapters enlighten about the untold and the effects they have in an educational environment the readers especially in the fields of education and social justice will definitely acquire a more sensitive perception of how silent partners affect our approaches to multicultural education dr regis machart senior lecturer universiti putra malaysia adjunct professor university of helsinki finland
