this book is a reproduction of an important historical work forgotten books
uses state of the art technology to digitally reconstruct the work preserving
the original format whilst repairing imperfections present in the aged copy in
rare cases an imperfection in the original such as a blemish or missing page
may be replicated in our edition we do however repair the vast majority of
imperfections successfully any imperfections that remain are intentionally left
to preserve the state of such historical works this book provides an overview
on the critical role of diagnostic imaging in the assessment of patients with
suspected alimentary tract perforation an emergent condition that requires
prompt surgery with the aid of numerous high quality images it is described how
different imaging modalities including plain film x ray ultrasonography and
multidetector row computed tomography mdct permit correct diagnosis of the
presence and cause of the perforation and of associated pathologies particular
attention is paid to mdct with full description of its role in a range of
scenarios at various levels of the alimentary tract imaging of gi tract
perforation in different patient groups such as pediatric patients the elderly
and oncologic patients is also addressed this volume will greatly assist
residents in radiology radiologists and physicians who are daily involved in
the management of patients with clinically suspected alimentary tract
perforation provides a clinically oriented encyclopedic review of all matters
that concern the alimentary tract with atlas like quality a logically organized
format a new image bank on cd rom and an emphasis on the latest techniques and
diagnostics the fifth edition of this reference on gastrointestinal surgery
covers procedures from the esophagus to the anus all five volumes of this fifth
edition have been revised and updated to include general and vascular surgical
treatments of gastrointestinal disorders leading authors in the field discuss
the most recent developments including surgery of the esophagus stomach and
duodenum biliary tract pancreas liver spleen colon and small intestine
