Infantry 1982 from the author of a splendid exchange comes a remarkable history of media from the alphabet to the internet that examines how it has shaped human society over millennia in *Masters of the Word* Bernstein chronicles the development of the technology of human communication or media starting with the birth of writing thousands of years ago in Mesopotamia in Sumer and then Egypt this revolutionary tool allowed rulers to extend their control far and wide giving rise to the world's first empires when Phoenician traders took their alphabet to Greece literacy's first boom led to the birth of drama and democracy in Rome it helped spell the downfall of empire as Bernstein illustrates new communication technologies from the clay tablet to the radio have all had a profound effect on human society but it's not just the technologies themselves that have changed the world it's access to them medieval scriptoria and vernacular bibles gave rise to religious dissent but it was only when the combination of cheaper paper and Gutenberg's printing press drove down the cost of books by some 97% that the dynamite of reformation was lit the industrial revolution brought the telegraph and the steam driven printing press allowing information to move faster than ever before and to reach an even larger audience but along with radio and television these new technologies were more easily exploited by the powerful as seen in Germany the Soviet Union and even Rwanda where radio incited genocide with the rise of carbon duplicators Russian samizdat photocopying the Pentagon papers and the internet and mobile phones the Arab Spring access has again spread and the world is both more connected and more free than ever before
