helsinki 26 30 august 1996 the first conference of this series took place in dublin 1955 second basel and locarno 1956 third cambridge 1958 fourth frankfurt am main and heidelberg 1961 fifth clermont ferrand and toulouse 1963 sixth albany and university park 1966 seventh prague and vienna 1969 eighth leningrad 1973 ninth galway 1977 tenth hamburg 1981 eleventh budapest 1984 twelfth vienna 1988 thirteenth salt lake city 1992 the atmospheric aerosol conference has been held jointly with the nucleation symposium since 1988 in vienna in order to stimulate contacts between researchers in these closely related fields the broad nature of the meeting and the scientific program resulted in 32 countries submitting papers for presentation covering both experimental and theoretical studies these papers are divided amongst the chapters on nucleation stratospheric aerosols and ice nucleation tropospheric aerosols and aerosol cloud climate interaction in addition to these contributed papers invitations to present a plenary lecture on topics of particular current interest were accepted by p j crutzen j gras j l katz a a lushnikov d oxtoby j e penner th peter f raes s e schwartz r strey and g vali these plenary papers together with the contributed papers provide a well balanced perspective of the current research over the entire field and highlight some important issues

IUPAC Handbook, 1996-1997 1997

annual reports in medicinal chemistry provides timely and critical reviews of important topics in medicinal chemistry together with an emphasis on emerging topics in the biological sciences which are expected to provide the basis for entirely new future therapies

Official Gazette of the United States Patent and Trademark Office 1996-08-13

the 1999 joint cryogenic engineering conference cec and international cryogenic materials conference icmc were held in montreal quebec canada from july 12th to july 16th the joint conference theme was cryogenics into the next millennium the total conference attendance was 797 with participation from 28 countries as with previous joint cec and icmc conferences the participants were able to benefit from the joint conference s coverage of cryogenic applications and materials and their interactions the conference format of plenary oral and poster presentations and an extensive commercial exhibit the largest in cec icmc history aimed to promote this synergy the addition of short courses workshops and a discussion meeting enabled participants to focus on some of their specialties the technical tour organized by suzanne gendron was of hydro quebec s research institute laboratories near montreal in keeping with the conference venue the entertainment theme was jazz culminating in the performance of vic vogel and his jazz big band at the conference banquet this 1999 icmc conference was chaired by julian cave of ireq institut de recherche d hydro quebec and the program chair and vice chair were michael green of the lawrence berkeley national laboratory and balu balachandran of the argonne national laboratory respectively we especially appreciate the contributions of both the cec and icmc boards and the conference managers centennial conferences under the supervision of paula pair and kim bass in making this conference a success

Nucleation and Atmospheric Aerosols 1996 1997-10-08

the articles collected in this volume are based on lectures given at the ima workshop computational radiology and imaging therapy and diagnostics march 17 21 1997 introductory articles by the editors have been added the focus is on inverse problems involving electromagnetic radiation and particle beams with applications to x ray tomography nuclear medicine near infrared imaging microwave imaging electron microscopy and radiation therapy planning mathematical and computational tools and models which play important roles in this volume include the x ray transform and other integral transforms the linear boltzmann equation and for near infrared imaging its diffusion approximation iterative methods for large linear and non linear least squares problems iterative methods for linear feasibility problems and optimization methods the volume is intended not only for mathematical scientists and engineers working on these and related problems but also for non specialists it contains much introductory expository material and a large number of references many unsolved computational and mathematical problems of substantial practical importance are pointed out

Annual Reports in Medicinal Chemistry 2010

indexes materials appearing in the society s journals transactions manuals and reports special publications and civil engineering

Genius V. County of Cook 2002

canada has a rich and interesting military intelligence history one that continues to grow at a rapidly expanding rate intelligence is a key element of operations enabling commanders to successfully plan and conduct operations it enables them to win decisive battles and it helps them to identify and attack high value targets in order to ensure commanders have the required support they need to plan and conduct operations members of canada s military intelligence branch are serving in an increasingly dangerous number of hotspots around the world in recent years they have served in bosnia herzegovina

haiti somalia rwanada east timor and afghanistan just to name a few while intelligence personnel have played a major role in ensuring the successful completion of these interdiction missions many of their stories remain classified this history cannot truly be complete until the official secrets act permits a clearer picture to be told out of darkness light volume 2 should however give the interested reader at least a partial view of some of the service that has been carried out on canada s behalf by the canadian forces intelligence branch for the years 1983 to 1997

Marion County Sheriff's Department 1998

major motion picture based on dark alliance and starring jeremy renner kill the messenger to be released in fall 2014 in august 1996 pulitzer prize winning journalist gary webb stunned the world with a series of articles in the san jose mercury news reporting the results of his year long investigation into the roots of the crack cocaine epidemic in america specifically in los angeles the series titled dark alliance revealed that for the better part of a decade a bay area drug ring sold tons of cocaine to los angeles street gangs and funneled millions in drug profits to the cia backed nicaraguan contras gary webb pushed his investigation even further in his book dark alliance the cia the contras and the crack cocaine explosion drawing from then newly declassified documents undercover dea audio and videotapes that had never been publicly released federal court testimony and interviews webb demonstrates how our government knowingly allowed massive amounts of drugs and money to change hands at the expense of our communities webb s own stranger than fiction experience is also woven into the book his excoriation by the media not because of any wrongdoing on his part but by an insidious process of innuendo and suggestion that in effect blamed webb for the implications of the story had been all but predicted webb was warned off doing a cia expose by a former associated press journalist who lost his job when years before he had stumbled onto the germ of the dark alliance story and though internal investigations by both the cia and the justice department eventually vindicated webb he had by then been pushed out of the mercury news and gone to work for the california state legislature task force on government oversight he died in 2004

modern methods and approaches such as the analysis of molecular sequences to infer evolutionary relationships among organisms have provided vast new sets of data to further our understanding of living organisms but there remain enigmas in the biological world that will keep scientists working and thinking for decades microorganisms by virtue of their small size and almost unbounded diversity provide ample examples of intriguing mysteries that are being challenged with all of the techniques the modern scientific arsenal can provide one whole arena of this battle to resolve puzzling mysteries about various microorganisms is the almost unbelievable ability of many micro organisms to live in extreme environments whether the challenge is extreme heat cold pressure hyper salinity alkalinity or acidity some micro organisms live now where no life might seem possible this fascinating state of affairs is the context for this present volume edited by joseph seckbach this volume is a compilation of many of the especially interesting questions and biological challenges that arise in the consideration of microorganisms in general and the extremophiles in particular

Law Enforcement Bulletin 2000-06-30

the transformation of v corps from a traditional tank heavy corps committed to a high intensity battle in central europe to a lighter more deployable reaction force simply based in central europe is an exemplar of the changes that confronted the army at large to be sustained this narrative outlines the major shifts in the operational context in which v corps found itself after 1990 and discusses the major military operations in which the corps took part those operations gave the headquarters the essential feedback to adjust its organization and training to be more in synch with the requirements it faced the study offers some tentative conclusions about the process of transformation of the army in europe as seen from the perspective of one heavy mechanized corps

Advances in Cryogenic Engineering Materials 2012-12-06

this book is a landmark in the continuously changing world of drugs it is essential reading for scientists and managers in the pharmaceutical industry who are involved in drug finding drug development and decision making in the development process

Computational Radiology and Imaging 1997

in 1962 a unique transport aircraft was built from the parts of 27 boeing b 377 airliners to provide nasa a means of transporting rocket boosters with an interior the size of a gymnasium the pregnant guppy was the first of six enormous cargo planes built by aero spacelines and two built by union de transport aeriens more than half a century later the last super guppy is still in active service with nasa and the design concept has been applied to next generation transports this comprehensive history of expanded fuselage aircraft begins in the 1940s with the military s need for a long range transport the author examines the development of competing designs by boeing convair and douglas and the many challenges and catastrophic failures behind the scenes maneuvers of financiers corporate raiders mobsters and other nefarious characters provide an inside look at aviation development from the drawing board to the scrap yard
