achieve their best scores on the pssa test get ready for the pssa math test with a perfect math workbook published by effortless math education effortlessmath com this series for key stage 3 mathematics has been written to match the framework for teaching mathematics comprising parallel resources for each year and covering all ability levels it provides a consistent but fully differentiated approach engage students in mathematics using growth mindset techniques the most challenging parts of teaching mathematics are engaging students and helping them understand the connections between mathematics concepts in this volume you ll find a collection of low floor high ceiling tasks that will help you do just that by looking at the big ideas at the eighth grade level through visualization play and investigation during their work with tens of thousands of teachers authors jo boaler jen munson and cathy williams heard the same message that they want to incorporate more brain science into their math instruction but they need guidance in the techniques that work best to get across the concepts they needed to teach so the authors designed mindset mathematics around the principle of active student engagement with tasks that reflect the latest brain science on learning open creative and visual math tasks have been shown to improve student test scores and more importantly change their relationship with mathematics and start believing in their own potential the tasks in mindset mathematics reflect the lessons from brain science that there is no such thing as a math person anyone can learn mathematics to high levels mistakes struggle and challenge are the most important times for brain growth speed is unimportant in mathematics mathematics is a visual and beautiful subject and our brains want to think visually about mathematics with engaging questions open ended tasks and four color visuals that will help kids get excited about mathematics mindset mathematics is organized around nine big ideas which emphasize the connections within the common core state standards ccss and can be used with any current curriculum 1 it is a series of eight textbooks for classes 1 to 8 that conforms to the vision of national curriculum framework and is written in accordance with the latest syllabus of the cbse 2 learning objectives lists well what a learner will know and be able to do after studying the chapter 3 let s recall refreshes the concepts learnt in the form of a revision exercise to brush up the concepts taught in

previous chapters or grades 4 let s begin introduction to the chapter 5 my notes tips to help the learner remember the important points formulae taught in the chapter 6 let s try simple straight forward questions for quick practice while studying any topic based on the first two levels of bloom s taxonomy knowledge and understanding 7 error alarm common mistakes which learners commit often along with the correct way of doing the same 8 know more additional information for the learners relating to the concepts learnt in the chapter 9 maths in my life includes questions relating maths to daily life and which can help relate the topic with the environment life around us 10 tricky maths challenge questions to help the learners build thinking skills and reasoning skills by solving tricky questions 11 project work projects which can help learners connect math with our daily life or that take the concepts learnt to a new level 12 concept map summary points to list the important concepts learnt in the chapter in a crisp form 13 test zone revision exercise of the concepts learnt in the chapter this includes both objective and subjective type of questions 14 mental maths maths problems for performing faster calculations mentally 15 maths master involves deep critical thinking of learners about any topic concept relation fact or anything related to that chapter may have open ended questions or extension of the topic 16 application in real life every chapter in each book also explains how and where it is used in daily life 17 in the lab math lab activities for helping the learners understand the concepts learnt through hands on experience 18 practice zone chapter wise practice sheets includes subjective questions for additional practice which are a part of each book an important dictum of learning is that theoretical learning must always be supplemented by practical learning this ensures proper understanding and comprehension besides better retention it eliminates the phobia and makes learning fun with this in mind the concept of activities in mathematics was introduced this series of books caters to the above requirement it is a sincere effort to sharpen the intellect through activity oriented learning to acquire mathematical skills and develop logical reasoning the ebook version does not contain cd
