Statistics of Land-grant Colleges and Universities

1962

composite work in economic research on higher education in the usa covers labour demand and supply of professional workers and university graduates financing educational investment etc references and statistical tables

Economics of Higher Education

1962

reconciliation what makes it possible what impedes it how to foster and promote it and how to build the social conditions in which it can flourish these are pressing questions for an increasingly significant concept in community and international relations this book is a creative engagement with the central terms of reconciliation forgiveness nationhood conflict resolution justice and memory and with approaches to questions of listening and understanding the other it is premised on the view that an essential pathway to the achievement of reconciliation lies in developing and disseminating critical concepts that capture the nuances of practice drawing on fields in the social sciences and humanities including post structuralism hermeneutics subaltern studies and social theory and elaborated in relation to contemporary sites of conflict and peace making this collection brings together a unique range of perspectives on the complex issue of reconciliation while offering responses to the key questions being asked of it today

Economics of Higher Education

1962

an introduction to real estate finance serves as the core of knowledge for a single semester first course in real estate finance unlike other real estate finance textbooks with their encyclopedic but often stale details it combines a short traditional text with a living website the book gives students and professors highly applied information and its regularly updated online features makes it especially useful for this practitioner oriented audience it covers fundamental topics such as accounting and tax mortgages capital markets reits and more it also addresses the 2008 financial crisis and its impact on the real estate profession this text is a valuable companion for students of real estate finance as well as financial analysts portfolio managers investors and other professionals in the field offers a concise efficient finance centric alternative to traditional real estate finance texts website gives readers the tools to find current information about their own areas of specialization a unique approach not found in other real estate finance textbooks gives students and professors the material to examine every subject in broad and highly detailed terms

Pathways to Reconciliation

2016-12-05

the sense of crisis that pervades global sport suggests that the war on doping is still very far from being won in this critical and provocative study of anti doping regimes in global sport paul dimeo and verner møller argue that the current system is at a critical historical juncture reviewing the recent history of anti doping this book highlights serious problems in the approach developed and implemented by the world anti doping agency wada including continued failure to accept responsibility for the ineffectiveness of the testing system the growing number of dubious convictions and damaging human rights issues without a total rethink of how we deal with this critical issue in world sport this book warns that we could be facing the collapse of anti doping both as a policy and as an ideology the anti doping crisis in sport causes consequences solutions is important reading for all students and scholars of sport studies as well as researchers coaches doctors and policymakers interested in the politics and ethics of drug use in sport it examines the reasons for the crisis the consequences of policy strategies and it explores potential solutions

An Introduction to Real Estate Finance

2013-10-14

contemporary society is complex governed and administered by a range of contradictory policies practices and techniques nowhere are these contradictions more keenly felt than in cultural policy this book uses insights from a range of disciplines to aid the reader in understanding contemporary cultural policy drawing on a range of case studies including analysis of the reality of work in the creative industries urban regeneration and current government cultural policy in the uk the book discusses the idea of value in the cultural sector showing how value plays out in cultural organizations uniquely the book crosses disciplinary boundaries to present a thorough introduction to the subject as a result the book will be of interest to a range of scholars across arts management public and nonprofit management cultural studies sociology and political science it will also be essential reading for those working in the arts culture and public policy

The Anti-Doping Crisis in Sport

2018-04-24

isotope effects have become one of the most powerful tools available to the enzymologist for probing enzymic mechanisms enzyme mechanism from isotope effects presents the basic theory underlying isotope effects including the latest findings on proton tunneling and coupled atomic motions specific theoretical applications are emphasized in regard to the types of information that can be obtained using isotope effects the book also examines recent theoretical treatments of the product dependence of deuterium isotope effects multiple isotope effects and isotope effects on intermediate partitioning other topics include a complete discussion of methods for measuring isotope effects including a detailed description of the use of the isotope ratio mass spectrometer to obtain isotope effects and a review of the literature

regarding mechanistic information obtained from isotope effects for individual classes of enzyme catalyzed reactions enzyme mechanism from isotope effects is an excellent reference source for investigators using isotope effects in their research the book is also valuable for reference libraries and instructors teaching courses in enzyme mechanism

Cultural Policy

2013-10-08

first published in 1998 loughlin examines the conception of rationality through the gazes of science philosophy and political philosophy to further explain the concept of rational reasoning the effects it has on the development on natural and social science and its implications on how we think about morals and politics

A Study of the Solubilization of Hexanol-1 in Detergent Solutions by the Method of Light Scattering

1951

the scientific marx was first published in 1986 minnesota archive editions uses digital technology to make long unavailable books once again accessible and are published unaltered from the original university of minnesota press editions marx advanced capital to the public as a scientific explanation of the capitalist economy intending it to be evaluated by ordinary standards of scientific adequacy today however most commentators emphasize marx s humanism or his theory of historical materialism over his scientific claims the scientific marx thus represents a break with many current views of marx s analysis of capitalism in that it takes seriously his claim that capital is a rigorous scientific investigation of the capitalist mode of production daniel little discusses the main features of marx s account applying the tools of contemporary philosophy of science he analyzes marx s views on theory and explanation in the social sciences the logic of marx s empirical practices the relation between capital and historical materialism the centrality of micro foundations in marx s analysis and the minimal role that dialectics plays in his scientific method throughout little relies on evidence taken from marx s actual practice as a social scientist rather than from his explicit methodological writings the book contributes to current controversies in the literature of analytic marxism joined by such authors as jon elster g a cohen and john roemer

The transformation of silicic acid to quartz and the synthesis of a

1956

john h mcclendon iii s clr james s notes on dialectics left hegelianism or marxism leninism is the first ever book devoted exclusively to james s magnum opus notes on dialectics hegel marx lenin the seed for this study was planted over thirty years ago when james handed the author his personal copy of notes james s contribution to dialectical philosophy and his vast intellectual and scholarly output is rivalled only by the seemingly bottomless depths of mcclendon s own analysis and erudition

mcclendon provides a thorough going critique of james s exploration into the dialectic of hegel marx and lenin while challenging all the seminal texts on james s notes a book of this magnitude is rare this is ever more the truth when it is focused on a giant like james who stands at the nexus of so many disciplines philosophy history sociology caribbean studies cultural studies african and african american studies clr james s notes on dialectics left hegelianism or marxism leninism is a must read for anyone concerned with how revolutionary theory is a guide to contemporary struggles

Enzyme Mechanism from Isotope Effects

1991-09-20

an extended historical and philosophical argument this book will be a valuable text for all students of the philosophy of the social sciences it discusses the serious alternatives to positivist and empiricist accounts of the physical sciences and poses the debate between naturalism and anti naturalism in the social sciences in new terms recent materialist and realist philosophies of science make possible a defence of naturalism which does not make concessions to positivism and which recognizes the force of several of the anti positivist arguments from the main anti naturalist neo kantian tradition the author presents a critical evaluation of empiricist and positivist theories of knowledge and investigates some classic attempts at using them to provide the philosophical foundation for a scientific sociology he takes the kantian critique of empiricism as the starting point for the main anti positivist and anti naturalist philosophical approaches to the social studies he goes on to investigate the inadequacy of post kantian arguments from rickert weber winch and others both against non positivist forms of naturalism and as the possible source of a distinctive philosophical foundation for the social studies the book concludes with a critical investigation of the marxian tradition and an attempt to establish the possibility of a materialist and realist defence of the project of a natural science of history which escapes the fundamental flaws of both positivist and neo kantian attempts at philosophical foundation
