of assyria from the third through the first millennium bce ideology is delineated here as a subdiscourse of religion rather than as an independent category anchoring it firmly within the religious world view tracing assur s cultural interaction with the south on the one hand and with the syro anatolian horizon on the other this volume articulates a northern cultural discourse that even while interacting with southern mesopotamian tradition managed to maintain its own identity it also follows the development of tropes and iconic images from the first city state of uruk and their mouvanance between myth image and royal inscription historiography and myth and myth and ritual suggesting that with the help of scholars key royal figures were responsible for introducing new directions for the and translations of each text analyzed here this book breaks new ground in the study of ancient legal systems the cad project was initiated in the early 1920s not long after james henry breasted founded the oriental institute in 1919 and barely one hundred years after the decipherment of the cuneiform script this initial decipherment and the soon to follow achievements in understanding the
