nineteenth century italy is a vast unexplored territory in the history of modern political thought and liberal democratic theory apart from mazzini pareto and mosca the authors of this period are little read even though their central concerns the riddle of human liberation progress and liberty are as important today as ever this volume presents a selection of the writings of carlo cattaneo 1801 1869 one of the period s most important thinkers as selected by an equally important personage of a subsequent time the anti fascist intellectual gaetano salvemini cattaneo had a profound sense of the historical contingencies underlying the quest both to understand human affairs and to realize a self governing society cattaneo s ideas and framework of analysis like those of john stuart mill and alexis de tocqueville were not shaped by a narrow intra academic agenda but by the great social economic and political transformations of his time the issues he addressed included problems of revolution reform and change in the passage to modernity which extended far beyond the confines of nineteenth century italy the selection of original pieces presented in this translation is preceded by an introduction by the editors carlo g lacaita and filippo sabetti which guides the reader through cattaneo s thinking and puts it in a comparative context ultimately however it is the editors goal to let this profound italian thinker speak for himself

a pathbreaking history of early modern education argues that europe s oldest university often seen as a bastion of traditionalism was in fact a vibrant site of intellectual innovation and cultural exchange the university of bologna was among the premier universities in medieval europe and an international magnet for students of law however a long standing

historiographical tradition holds that bologna and italian university education more broadly foundered in the early modern period on this view bologna s curriculum ossified and its prestige crumbled due at least in part to political and religious pressure from rome meanwhile new ways of thinking flourished instead in humanist academies scientific societies and northern european universities david lines offers a powerful counternarrative while bologna did decline as a center for the study of law he argues the arts and medicine at the university rose to new heights from 1400 to 1750 archival records show that the curriculum underwent constant revision to incorporate contemporary research and theories developed by the likes of rené descartes and isaac newton from the humanities to philosophy astronomy mathematics and medicine teaching became more systematic and less tied to canonical texts and authors theology meanwhile achieved increasing prominence across the university although this religious turn reflected the priorities and values of the catholic reformation it did not halt the creation of new scientific chairs or the discussion of new theories and discoveries to the contrary science and theology formed a new alliance at bologna the university of bologna remained a lively hub of cultural exchange in the early modern period animated by connections not only to local colleges academies and libraries but also to scholars institutions and ideas throughout europe

this book uncovers the remarkable story of a fake saint to tell a tale about truth it begins at the end of the 1650s when a large quantity of forged documents suddenly appeared throughout the kingdom of naples narrating the life and deeds of a previously unknown medieval saint named giovanni calà the trove generated much excitement around the kingdom no one was more delighted by the news than carlo calà giovanni s wealthy and politically influential seventeenth century descendant attracted by the prospect of adding a saint to the family tree carlo presented giovanni s case to the roman curia the catholic authorities immediately realized that the sources were forged and that giovanni was not real let alone holy yet it took more than two decades before the forgery was exposed why vividly reconstructing the intricate case of the supposed saint the book reveals the tensions between historical and theological truth how much could the truth of doctrine depend on the truth of the facts before religion lost its connection with the supernatural to what extent could theology ignore the truth of history without ending up engulfed in falsity and deceit this story of a fake saint illuminates early modern tensions but the struggles

to distinguish between facts opinions and beliefs remain with us examining how our predecessors dealt with the relationship between truth and authenticity guides us too in thinking through what is true and what is not

in naples and napoleon john davis takes the southern italian kingdom of the two sicilies as the vantage point for a sweeping reconsideration of italy's history in the age of napoleon and the european revolutions the book's central themes are posed by the period of french rule from 1806 to 1815 when southern italy was the mediterranean frontier of napoleon's continental empire the tensions between naples and paris made this an important chapter in the history of that empire and revealed the deeper contradictions on which it was founded but the brief interlude of napoleonic rule later came to be seen as the critical moment when a modernizing north finally parted company from a backward south although these arguments still shape the ways in which italian history is written in most parts of the north political and economic change before unification was slow and gradual whereas in the south it came sooner and in more disruptive forms davis develops a wide-ranging critical reassessment of the dynamics of political change in the century before unification his starting point is the crisis that overwhelmed the italian states at the end of the 18th century when italian rulers saw the political and economic fabric of the ancien régime undermined throughout europe in the south the crisis was especially far-reaching and this davis argues was the reason why in the following decade the south became the theatre for one of the most ambitious reform projects in napoleonic europe the transition was precarious and insecure but also mobilized political projects and forms of collective action that had no counterparts elsewhere in italy before 1848 illustrating the similar nature of the political challenges facing all the pre-unification states although unification finally brought italy's insecure dynastic principalities to an end it offered no remedies to the insecurities that

from much earlier had made the south especially vulnerable to the challenges of the new age which was why the south would become a problem italy s southern problem

the early decades of the sixteenth century were a turbulent time for the italian peninsula as competing centres of power struggled for political control nowhere was this more true than the area contested by milan and venice that was constantly crossed and occupied by rival armies investigating the impact of successive crises upon the inhabitants of the po valley this book challenges many fundamental assumptions about the relationship between war and economic development and draws conclusion that have implications for early modern europe as a whole in traditional historiography periods of war and general crisis have often been regarded as promoting a shift in resources from the communal towards a small number of individuals however through a close micro study of a single region this book offers a different perspective rather than promoting an aggressive individualism it is argued that in times of general crisis social networks aimed to reproduce themselves and the original status quo by developing creative solutions and institutions favouring co operation furthermore the elites could not always exploit local wealth because of the need to protect their position of leadership within the community which required the preservation of that very community this thesis not only challenges the received wisdom but also fuels a new debate about the ways in which economic growth occurred in early modern italy and europe

in early modern times religious affiliation was often communicated through bodily practices despite various attempts at definition these practices remained extremely fluid and lent themselves to individual appropriation and to evasion of church and state control because bodily practices prompted much debate they serve as a useful starting point for examining denominational divisions allowing scholars to explore the actions of smaller and more radical divergent groups the focus on bodies and conflicts over bodily practices are the starting point for the contributors to this volume who depart from established national and denominational historiographies to probe the often ambiguous phenomena occurring at the interstices of confessional boundaries in this way the authors examine a variety of religious living conditions socio cultural groups and spiritual networks of early modern europe and the americas the cases gathered here skillfully demonstrate the diverse ways in which regional and local differences affected the interpretation of bodily signs this book will appeal to scholars and students of early modern europe and the americas as well as those interested in religious and gender history and the history of dissent

this book examines the development of social support systems in the modern age in the rural areas of the city states of northern italy this investigation achieves two main purposes first it allows researchers to understand the role occupied concretely by welfare and micro credit activities in the political and socio economic panorama of rural northern italy secondly it verifies to what extent the formation of a more or less structured support system influenced the establishment of local identity and the rooting of individuals the book brings together perspectives from different fields of research ranging from economic and political history to the study of the history of ecclesiastical institutions as well as integrating recent research on the anthropological value of welfare actions and the use of multiple historical sources it considers how the retreat of the welfare activity of the state associated with a depopulation of the rural areas of the peninsula and a steady increase of poverty into social fringes that were previously not affected by economic problems pushes us to investigate more carefully the dynamics that in the ancien régime gave shape to the support activities against indigence and poverty this book will be of interest to academics and students working in economic history and social history

reforms of christian life presents a new narrative of the role of the barnabites and angelics the ursulines and the somascans founded in northern italy in the 1530s by battista da crema angela merici and girolamo miani within sixteenth century italian reform movements while historiography has considered these companies under the category of catholic reformation this book argues that they promoted an unconventional view of perfection and of the church that was alternative to both roman catholicism and lutheranism and through which they wanted to reform society rather than the ecclesiastical institution by highlighting the complex articulation of perceptions of christian life and by exploring neglected connections among devout milieus mazzonis considers the sodalities in continuity with a fifteenth century ascetic mystical current and in relation to contemporary institutes such as the jesuits and the oratorians irenic reforming circles like that of juan de valdés and post tridentine ecclesiastical reformers including charles borromeo this volume shows that reforming trends were more varied and fluid than previously thought and contributes to cultural and gender analyses of the religious mentality of the period reforms of christian life is a useful tool for students and scholars of medieval and early modern religious and cultural history
