The Albany Law Journal 1882 in data publishing the owner delegates the role of satisfying  
user queries to a third party publisher as the servers of the publisher may be untrusted or  
susceptible to attacks we cannot assume that they would always process queries correctly  
hence there is a need for users to authenticate their query answers this book introduces  
various notions that the research community has studied for defining the correctness of a  
query answer in particular it is important to guarantee the completeness authenticity and  
minimality of the answer as well as its freshness we present authentication mechanisms for a  
wide variety of queries in the context of relational and spatial databases text retrieval and  
data streams we also explain the cryptographic protocols from which the authentication  
mechanisms derive their security properties table of contents introduction cryptography

**Virginia Law Journal** 1882 how can we characterise law and legal theory in the twenty first  
century law after modernity argues that we live in an age after modernity and that legal  
theory must take account of this fact the book presents a dynamic analysis of law which  
focusses on the richness and pluralism of law on its historical embeddedness its cultural  
contingencies as well as acknowledging contemporary law's global and transnational  
dimensions however law after modernity also warns that the complexity fragmentation

pluralism and globalisation of contemporary law may all too easily perpetuate injustice in this respect the book departs from many postmodern and pluralist accounts of law indeed it asserts that the quest for justice becomes a crucial issue for law in the era of legal pluralism and it investigates how it may be achieved the approach is fresh contextual and interdisciplinary and unusually for a legal theory work is illustrated throughout with works of art and visual representations which serve to re enforce the messages of the book
