subjects making it an essential reference for music education programs the original handbook of research on music teaching and learning published in 1992 with the sponsorship of the music educators national conference menc was hailed as a welcome addition to the literature on music education because it serves to provide definition and unity to a broad and complex field choice this new companion volume again with the sponsorship of menc explores the significant changes in music and arts education that have taken place in the last decade notably several chapters now incorporate insights from other fields to shed light on multi-cultural music education gender issues in music education and non-musical outcomes of music education other chapters offer practical information on maintaining musicians' health training music teachers and evaluating music education programs philosophical issues such as musical cognition the philosophy of research theory curriculum and educating musically are also explored in relationship to policy issues in addition to surveying the literature each chapter considers the significance of the research and provides suggestions for future study covering a broad range of topics and addressing the issues of music education at all age levels from early childhood to motivation and self-regulation this handbook is an invaluable resource for music teachers researchers and scholars the vision of music as a vital lifelong form of human activity the need for creating heightened awareness of what a musical culture means both for musicians and for society the urgency of exploring ways in which involvement in the art may be nurtured at every stage of development and the commitment to real values and real meanings all are expressed here with clarity and eloquence they are also addressed from

multiple perspectives gaining significance with each affirmation editor s note technology is an increasingly popular part of music education in schools that attracts students to school music who might not otherwise be involved in many teacher preparation programs music technology is an afterthought that does not receive the same extensive treatment as do traditional areas of music teaching such as band orchestra choir and general music this book helps to establish a theoretical and practical foundation for how to teach students to use technology as the major means for developing their musicianship including discussions of lesson planning lesson delivery and assessment readers will learn how to gain comfort in the music technology lab theory and practice of technology based music instruction also includes profiles of practice that dive into the experiences of real teachers in music technology classes their struggles their successes and lessons we can learn from both in this second edition new profiles feature teachers of color who use technology extensively in their varied types of music teaching this edition encourages readers to think about issues of inequity of social justice in music education technology and how teachers might begin to address those concerns also updated are sections about new standards that may guide music education technology practice about distance and technology enhanced learning during the global pandemic and about ways to integrate technology in emerging contexts at the beginning of chapter 1 i quote author arthur c clarke who wrote any sufficiently advanced technology is indistinguishable from magic 1984 p 36 to me technology has always been somewhat magical growing up i liked both magic tricks and electronic gadgets when i was very young i remember being picked out of the audience by a magician to help him with a trick thrilled with the seemingly mystical act that he accomplished with my assistance i loved seeing magicians live or on tv and i borrowed magic books from the local public library to learn tricks that i tried out on my family as i became older and obtained various technological devices they too fascinated me with the somewhat magical to me things they were able to do two items in particular stand out in my memory i acquired an analog audio tape recorder that i used to play duets with myself by recording one part and then playing it back while performing the other part live this made practicing my euphonium so much more fun and likely increased my practice time as i worked to record the perfect take of each line of the various duets i had in my books i was also excited to receive a cb radio one christmas which allowed me to stay in close contact at all times of the day and night with my best friend who had received the same gift it augmented my social network such as it existed in those days in addition it was amazing to be able to use the radio to listen to and learn from the conversations picked out of the air of people from all over technology had magical qualities and i loved how it allowed me to do things that were otherwise not possible as well as things that made life more interesting and enjoyable i still feel the same way today where does education happen in classrooms teachers can provide the ultimate reform of education and teachers can be the ultimate
