house cleaning has been an innate human activity forever but only since the early 19th century have mechanical devices replaced the physical labor performed mostly by women mechanical carpet sweepers were replaced by manual suction cleaners which in turn were replaced by electric vacuum cleaners in the early 20th century innovative inventors who improved vacuum cleaners as electricity became commonly available made these advances possible many early manufacturers failed but some such as bissell hoover eureka and others became household names as they competed for global dominance with improved features performance and appearance this book describes the fascinating people who made this possible as well as the economic cultural and technological contexts of their times from obscure beginnings 200 years ago vacuum cleaners have become an integral part of modern household culture

in a well managed building maintenance work should in fact continue throughout the year under an adequate preventive maintenance policy prevention is better than cure is an axiom well applicable to the maintenance of buildings also it is not that the related information is not available it is scattered over many pamphlets and books an individual does not have access to many of books and libraries thus there is a need for a compilation of most of the available information in this book an attempt has been made to compile this information the idea has been to present it in a single book form a book of this nature has obviously to depend upon published books both indian and foreign articles and pamphlets the author has drawn freely from all these sources but the book is not a compilation only the information has been digested and put up in an intelligible form the author has supplemented the information with the experience he has gathered over 34 years of civil and other engineering in the field
