the story of the mahabharata is not only of the great war between the kouravas and pandavas for a period of eighteen days in the battlefield of kurukshetra near delhi as a matter of fact the supreme lesson held out by the great epic is the one with which vyasa deva the author starts viz when men live together as one family they not only thrive but they exist as a great community or race as long as the pandavas and kauravas lived together they not only thrived as two great wings of a race but as one and the same race of the kurus as we proceed with the story of the mahabharata we notice how this was stabilised as long as they lived together with each other and we have noticed how the great war reduced the powerful kurus and decimated them to a struggling few to call themselves as remnants of the great kuru race this holds good not only in the case of few families living together in small units but number of races living in the world culminating in the truth noticed in the maxim one world one family which is the title of the next work by the same author

an attentive reader embarking on this book might wonder what the economic transition to which the title refers might be in this century almost all countries have gone through periods of economic transition but which period of economic history can claim to embody the notion or to represent the era of the transition definitely no country or group of countries has experienced anything comparable to the economic upheavals that the fall of communism has brought about in a large portion of the world in just three years 1989 to 1991 no other transition to date has prompted more interest and more studies among economists academics and policy makers than has the transformation of centrally planned economies into market based systems it is this transformation that has come to define the transition early in the transformation process in november 1990 with the support of the centre for co operation with the economies in transition ccet i launched a conference to examine the challenges faced by these countries about six years have gone by and a new economic landscape has emerged in that part of the world the difficulties in
