

## Free download The capstone handbook .pdf

this handbook is a compilation of important materials and forms students will need to complete the capstone experience in mass communications at delaware state university while this is not an exhaustive handbook it provides foundational material that will help students to successfully navigate the capstone process the capstone itself is an exciting and enterprising opportunity for students to showcase what they have learned both fundamentally theoretically and practically as it relates to the concentrations areas offered at dsu the only practical guide for helping social work students create high quality applied capstone research projects from start to finish this mentor in a book provides social work students with invaluable information on designing implementing and presenting first rate applied research projects focused on improving social work programs and services taking students step by step through the entire process the book helps students plan their projects by providing descriptions of the various research methodologies that can be used to improve social work programs and services it offers extensive instruction on how to write effectively by providing detailed information on all written components of capstone research projects as well as the dos and don ts of writing research reports covering data collection methods program evaluation organization and community needs assessments practice effectiveness studies and quantitative and qualitative data analysis this brand new book also addresses best practices for presenting findings upon completion of the applied research project additional features include abundant case examples demonstrating the application of theory to practice and an examination of both qualitative and quantitative research approaches while also helping students demonstrate social work practice competencies within their capstone projects practice activities in each chapter help students apply knowledge to their research projects and technology exercises help students master important digital research techniques a capstone project checklist and competency log help students monitor progress and qr codes provide supplementary support and resources additional faculty resources include competency rubrics detailed group exercises for each chapter and a sample syllabus for faculty purchase of the book includes digital access for use on most mobile devices or computers key features delivers step by step information on creating high quality social work capstone projects from conception through presentation includes a detailed summary of the major applied research approaches to improving social work programs and services explains how to research literature and write a problem statement on a social service issue contains extensive information on how to write effective capstone research papers along with abundant examples helps students to demonstrate social work practice competencies offers case examples throughout to demonstrate the application of theory to practice presents practice activities and technology exercises in each chapter provides a capstone project checklist and competency log includes qr codes providing additional resources for each chapter to be a soldier offers the us army s two capstone doctrinal manuals in one place for the first time this guide begins with the army s introductory text fm 1 the army which explains the army s origin and purpose its mission and values how it functions as a portion of a joint military force in combat and the importance of the individual soldier in a larger fighting force when readers have learned the fundamentals of the army fm 3 operations provides foundational knowledge of the full spectrum of army operations this manual is the army s principal tool for the instruction of today s soldiers in the art and science of warfare and has been recently updated to discuss counter insurgency and hybrid threats in addition to conventional land operations to be a soldier is the reader s guide to the army s most fundamental knowledge by offering its two capstone texts in one place the information in this handbook forms the basis for all the knowledge conveyed in any subsequent army field manuals making it required reading for all soldiers and readers with interest in us army training and operations to be a soldier offers the us army s two capstone doctrinal manuals in one place for the first time this guide begins with the army s introductory text fm 1 the army which explains the army s origin and purpose its mission and values how it functions as a portion of a joint military force in combat and the importance of the individual soldier in a larger fighting force when readers have learned the fundamentals of the army fm 3 operations provides foundational knowledge of the full spectrum of army operations this manual is the army s principal tool for the instruction of today s soldiers in the art and science of warfare and has been recently updated to discuss counter insurgency and hybrid threats in addition to conventional land operations to be a soldier is the reader s guide to the army s most fundamental knowledge by offering its two capstone texts in one place the information in this handbook forms the basis for all the knowledge conveyed in any subsequent army field manuals making it required reading for all soldiers and readers with interest in us army training and operations product design and development handbook an innovative entrepreneurial and structured approach for engineering capstone and industry projects enables engineering students and practicing engineers to conduct successful product design and development projects the text uses the phased product development ppd process which was developed by the authors and features two key elements mini milestones that keep project design and development teams on schedule and within budget and the use of phase exit checklists that ensure the team demonstrates evidence of meeting all accreditation board for engineering and technology abet and entrepreneurial mindset em outcomes the book is divided into 44 modules that align with a two semester capstone product development course or can be tailored to support a one

semester course each module includes pre and post class session assignments that break the development process into mini milestones an example project the design and development of a travel iron is provided to help teams understand how the information in the text can be applied to an actual project in addition to covering design this handbook also addresses the important tasks of manufacturing developing and validating an engineering prototype it integrates product engineering into the overall commercialization process the attributes of thinking like an engineer and meeting the sponsor s expectations are emphasized throughout the book and paired with industry examples the role of the engineering team in the overall product development effort is addressed using the goldsmith commercialization model the entrepreneurial mindset is integrated into each development phase and the arizona state university asu fulton schools of engineering fse em fse 2 0 indicators are included in the phase exit checklists product design and development handbook is applicable to single discipline multi discipline and trans discipline team based product design and development projects and programs though the handbook uses mechanical engineering projects as a baseline it can support all engineering disciplines capstone inquiry action at school addresses the what why and how of capstone education capstone programs are modern rituals that give meaning back to schooling and create transformative relationships between students and teachers capstone programs energize schools and can point the way for institutional change written by teachers for teachers capstone contains ready to implement materials derived from decades of experience in the classroom the authors share authentic narratives of failure and success to encourage teachers who are engaged in the risks and rewards of deep learning capstone is implementable capstone offers concrete tips and templates for teachers capstone collects in one place all the resources a teacher needs to build a program from the ground up capstone is compelling written by teachers capstone communicates through a shared experience of the classroom capstone offers support for teachers who are committed to authentic student learning capstone is connected capstone shares emerging practices being developed by current capstone educators and informed by the collected wisdom of the national capstone consortium capstone pharmacy review is a helpful guide developed to assist pharmacy students preparing to sit for the naplex certification exam in pharmacy this valuable study tool reviews content relevant to the three basic competency areas guiding the naplex exam associating a given question with the given competency the proportions of review material devoted to areas of pharmacy practice such as preparation and dispensing of medications pharmacotherapy considerations and drug information match those allocated to these areas in the naplex this well organized review guide will help naplex candidates quickly master facts and apply reasoning for specific drugs dietary supplements diseases symptoms and diagnoses with explanations that engage the reader through illustrations tables and figures this review guide is constructed to provide high yield content in a manageable format for ideal comprehension and retention capstone pharmacy review meets the needs of both students preparing for the naplex and the practicing pharmacist desiring a comprehensive practice overview includes the most comprehensive and expansive selection of pharmacy calculations for review and study reviews the top 200 drugs therapeutic class mechanism of action patient counseling side effects dose drug interactions and contraindications includes a comprehensive federal law review covers pharmacology preceding a review of therapeutics includes helpful illustrations tables and appendices provides access to both text and online review material including an online practice exam includes case based and non based questions which address each of the three naplex competencies includes plans for group study enrich your students and the institution with a high impact practice designing and teaching undergraduate capstone courses is a practical research backed guide to creating a course that is valuable for both the student and the school the book covers the design administration and teaching of capstone courses throughout the undergraduate curriculum guiding departments seeking to add a capstone course and allowing those who have one to compare it to others in the discipline the ideas presented in the book are supported by regional and national surveys that help the reader understand what s common what s exceptional what works and what doesn t within capstone courses the authors also provide additional information specific to different departments across the curriculum including stem social sciences humanities fine arts education and professional programs identified as a high impact practice by the national survey of student engagement nsse and the association of american colleges and universities leap initiative capstone courses culminate a student s final college years in a project that integrates and applies what they ve learned the project takes the form of a research paper a performance a portfolio or an exhibit and is intended to showcase the student s very best work as a graduating senior this book is a guide to creating for your school or department a capstone course that ties together undergraduate learning in a way that enriches the student and adds value to the college experience understand what makes capstone courses valuable for graduating students discover the factors that make a capstone course effective and compare existing programs both within academic disciplines and across institutions learn administrative and pedagogical techniques that increase the course s success examine discipline specific considerations for design administration and instruction capstones are generally offered in departmental programs but are becoming increasingly common in general education as well faculty and administrators looking to add a capstone course or revive an existing one need to understand what constitutes an effective program designing and teaching undergraduate capstone courses provides an easily digested summary of existing research and offers expert guidance on making your capstone course successful grab your handlebars and get ready for high octane action on wheels edge books bmx extreme grips the racetrack as the latest generation of extreme competitors demonstrate their prowess in

one of sport s most daring competitions bmx extreme kicks up dirt responding to the oppression of addiction brings together the voices of over 40 academics and social work practitioners from across canada to provide a diverse and multidimensional perspective to the study of addiction this thoroughly updated edition features eight new chapters and streamlines the content of the previous editions with chapters condensed and combined to create a more accessible text the fourth edition features new content on themes such as residential schools prevention initiatives special needs of different populations policy perspectives framed within an anti oppression standpoint cognitive behavioral therapy and the emerging topic of problem gambling returning chapters have been updated with contributors providing more in depth examinations of trauma informed approaches the entire volume has a strengthened anti oppressive framework on both an overarching and by chapter level this celebrated and varied collection is an indispensable resource for upper level students graduate students and practitioners working in the fields of social work addictions studies and the helping professions features thoroughly updated chapter by chapter content grounded in an anti oppressive framework with deeper exploration of trauma informed approaches provides an authoritative analysis of the practices and policies that contribute to the construction of the meaning of addiction through a canadian lens systems engineering for the digital age comprehensive resource presenting methods processes and tools relating to the digital and model based transformation from both technical and management views systems engineering for the digital age practitioner perspectives covers methods and tools that are made possible by the latest developments in computational modeling descriptive modeling languages semantic web technologies and describes how they can be integrated into existing systems engineering practice how best to manage their use and how to help train and educate systems engineers of today and the future this book explains how digital models can be leveraged for enhancing engineering trades systems risk and maturity and the design of safe secure and resilient systems providing an update on the methods processes and tools to synthesize analyze and make decisions in management mission engineering and system of systems composed of nine chapters the book covers digital and model based methods digital engineering agile systems engineering improving system risk and more representing the latest insights from research in topics related to systems engineering for complicated and complex systems and system of systems based on validated research conducted via the systems engineering research center serc this book provides the reader a set of pragmatic concepts methods models methodologies and tools to aid the development of digital engineering capability within their organization systems engineering for the digital age practitioner perspectives includes information on fundamentals of digital engineering graphical concept of operations and mission and systems engineering methods transforming systems engineering through integrating m s and digital thread and interactive model centric systems engineering the ooda loop of value creation digital engineering measures and model and data verification and validation digital engineering testbed transformation and implications on decision making processes and architecting tradespace analysis in a digital engineering environment expedited systems engineering for rapid capability and learning and agile systems engineering framework based on results and insights from a research center and providing highly comprehensive coverage of the subject systems engineering for the digital age practitioner perspectives is written specifically for practicing engineers program managers and enterprise leadership along with graduate students in related programs of study this wonderful and informative resource provides a definitive base of information for those engaged in clinical inquiry it not only presents the information in a systematic format it also provides specific examples of projects that have been completed by advanced practice nurses score 100 5 stars ódoodyís medical reviews advanced nursing practitioners who conduct practice based studies will welcome this innovative text designed specifically to meet their clinical inquiry and research needs it is the only book to address the complexities of inquiry from a practice project rather than research perspective the text builds on research concepts learned in the undergraduate and beginning levels of graduate study that combined with the vast amount of knowledge and experience gained by the apn student facilitate movement to the next level of understanding how clinical research differs from traditional quantitative research the book fosters the development of such skills as finding reading critiquing and translating research for use in evidenced based practice within the health care system with a specific population or for policy development the foundation of the text is the scholarship of integration and application one of the core competencies of dnp education content is clearly organized to build from simple to greater complexity of information and each chapter features learning objectives learning activities review questions and recommendations for additional reading key features provides a practice guide for clinical inquiry and research used to demonstrate practice outcomes written by a senior faculty highly experienced in teaching the clinical inquiry course illustrates the application of scholarship of integration and applicationí core competency presents content systematically from simple to complex clearly written and useful as a guide for dnp student program project design and evaluation labored the state ment and future of work in composition edited by randall mcclure dayna v goldstein and michael pemberton offers both a retrospective and a prospective look at the 1989 statement of principles and standards for the postsecondary teaching of writing and its relation to the changing nature of work in composition stemming from an investigative project to strengthen the statement with data culled from national reports on labor conditions this collection draws on the expertise of scholars whose research agendas and lived experiences afford fresh insights and critical analyses on labor issues in composition and writing program administration a major contribution to both the pragmatist renaissance and the transnational turn toward theorizing in

qualitative research adele e clarke author of situational analysis grounded theory after the postmodern turn in abductive analysis iddo tavory and stefan timmermans provide a new navigational map for theorizing qualitative research they outline a way to think about observations methods and theories that nurtures theory formation without locking it into predefined conceptual boxes the book provides novel ways to approach the challenges that plague qualitative researchers across the social sciences how to conceptualize causality how to manage the variation of observations and how to leverage the researcher s community of inquiry abductive analysis is a landmark work that shows how a pragmatist approach provides a productive and fruitful way to conduct qualitative research in abductive analysis iddo tavory and stefan timmermans make a case that the thought of pragmatist philosopher charles s peirce specifically his theories of hypothetical reasoning and semiotics can be used to guide and improve qualitative research every qualitatively minded sociologist should consider their strong well crafted argument neil gross author of richard rorty the making of an american philosopher in this ground breaking book tavory and timmermans open a new direction for qualitative inquiry that cuts across current internal divisions and debates by reframing the logic and process of making sense of data within a pragmatic approach they give new life to the craft of theorizing thoughtful and intellectually exciting abductive analysis is both inspired and inspiring diane vaughan author of the challenger launch decision risky technology culture and deviance at nasa the wpa outcomes statement a decade later examines the ways that the council of writing program administrators outcomes statement for first year composition has informed curricula generated programmatic institutional and disciplinary change and affected a disciplinary understanding of best practices in first year composition undertaking capstone and final year projects in psychology serves a seminal purpose in guiding its readers to create a capstone project the text employs traditional and emerging methodologies and methods in order to posit an exhaustive approach that the psychology students can adopt to see their project to fruition the text aims at fortifying the reader s skills through the structure of its chapters as they begin to work on their capstone or final year project the chapters collectively explore the varied aspects that are involved in the completion of a final year project that is beginning from the inception of the idea to laying the foundation designing the project analysing the data and finally presenting the findings the text guides the reader through each step and provides further guidance on approaching the idea coming up with the research question positioning it within the epistemological and ontological context and constructing the theoretical framework to arrive at the optimal design solutions the text will be useful for psychology students who are currently completing a capstone or a final year project it is further aimed at psychology students who will subsequently be working on a project and are looking forward to gaining cognisance regarding the approach and the methodology to be adopted for the same the business world has changed beyond all recognition in recent years new skills insights tools technologies and best practice have emerged the capstone encyclopaedia of business brings all of this progress together distilling the facts and essential information into one single volume it represents the most up to date authoritative and accessible guide to the modern business world available providing a gateway to the state of the art in marketing finance strategy leadership people management and beyond the capstone encyclopaedia of business is organized alphabetically into over 1 000 entries covering the whole spectrum of business and management including business terms concepts thinkers practitioners organizations brands companies each entry provides a sharp incisive overview of the subject and crucially points to how the ideas can be put into practice the capstone encyclopaedia of business makes sense of the new world of business embracing the best of the new and the most robust of the old the first one volume accessibly priced reference book for business in years kicks off this exciting new series and will anchor capstone as the one stop shop for busy professionals key title in large promotion including web site and extract mailings internationally recognized editorial board annual updates will occur making this a classic key title to keep on the shelves mysterious places dot the globe from stonehenge and the bermuda triangle to the overtoun bridge and the yonaguni ruins mesmerizing locations are everywhere the business world has changed beyond all recognition in recent years new skills insights tools technologies and best practice have emerged the capstone encyclopaedia of business brings all of this progress together distilling the facts and essential information into one single volume it represents the most up to date authoritative and accessible guide to the modern business world available providing a gateway to the state of the art in marketing finance strategy leadership people management and beyond the capstone encyclopaedia of business is organized alphabetically into over 1 000 entries covering the whole spectrum of business and management including business terms concepts thinkers practitioners organizations brands companies each entry provides a sharp incisive overview of the subject and crucially points to how the ideas can be put into practice the capstone encyclopaedia of business makes sense of the new world of business embracing the best of the new and the most robust of the old the first one volume accessibly priced reference book for business in years kicks off this exciting new series and will anchor capstone as the one stop shop for busy professionals key title in large promotion including web site and extract mailings internationally recognized editorial board annual updates will occur making this a classic key title to keep on the shelves although web based technologies have greatly influenced our society only recently has its impact affected educational practices curriculum learning and teaching advancements in online education highlights the models and frameworks that have been effective in the development of online education into the classroom by bringing together knowledge and experience this book allows educational technologies to be evaluated in a more dynamic context it is suitable for teachers researchers and academic experts

interested in rethinking the fundamental processes of teaching and learning print courses smart undertaking capstone projects in education provides students with all of the information required to successfully design and complete a capstone project guiding the reader in a step by step process this book covers how to create a question select a topic of interest and apply the best possible design solutions structured in a way that will help readers build their skills chapters explore all aspects of the capstone project from the inception of the idea to laying the foundations designing the project analysing the data and presenting the findings filled with examples and written in a friendly and collaborative style this key guide uses simple language and easy to understand examples to unpack complex research issues this book is essential reading for students and anyone interested in undertaking a capstone project in the field of education drama and adventure absorbingly intertwine as author walter efe tete stirs the publishing world with his literary prowess in his newly released novel the capstone saga he immerses readers into the life of one man who battles to stay strong amid adversities relying solely on the power of hope determination and compassion for others being the son of a powerful chief of an entire community scotty stone was born and introduced to a polygamous family in africa chief eyikemi had seven wives at a time one of whom was scottys mom victoria who died early in life now alone with his siblings scotty and his siblings are by default taken in by their stepmothers in the villa he is confronted with a life of misery his only option is to survive everything that is thrown at him this leads him to have a tougher personality and a more principled life making him a strong force to reckon with in society both at home and abroad with the hope of making it big scotty migrates to the united states of america not long after he sees himself living his dream with no knowledge that it wouldnt last long how far will this young man go to truly find himself readers will unravel as scottys powerful survival skills come face to face with dreadful challenges in the engrossing pages of the capstone saga note this novel is a work of fiction this essential book takes students and instructors through steps undertaken in a start to finish engineering project as conceived and presented in the engineering capstone course the learning experience follows an industry model to prepare students to recognize a need for a product or service create and work in a team identify competition patent overlap and necessary resources generate a project proposal that accounts for business issues prepare a design develop and fabricate the product or service develop a test plan to evaluate the product or service and prepare and deliver a final report and presentation throughout the book students are asked to examine the business viability aspects of the project the engineering capstone course fundamentals for students and instructors emphasizes that a design must meet a set of realistic technical specifications and constraints including examination of attendant economics environmental needs sustainability manufacturability health and safety governmental regulations industry standards and social and political constraints the book is ideal for instructors teaching or students working through the capstone course accelerate your transition to nursing success excel in your senior practicum pass the nclex rn and flourish in your new nursing career a streamlined outline format case studies clinical alerts and quick reference tables ensure you easily master the knowledge skills and attitudes to succeed as an rn recent years have seen an increasing emphasis on local ownership in united nations peacekeeping advocates assert that it boosts the legitimacy and sustainability of peacekeeping by helping to preserve the principles of self determination and non imposition in an activity that can contravene them however whether this assertion holds in practice has not been backed up by careful conceptual and empirical analysis this book fills this gap by mapping the discourse understandings and operationalization of local ownership in un peacekeeping both from the perspective of the un and local actors drawing on the case of the un peacekeeping operation in dr congo and a number of other cases it shows that despite its regular invocation of local ownership discourse the un operationalizes ownership in restrictive ways that are intended to protect the achievement of operational goals but which consequently limit self determination and increase external imposition on the host country this gap between the rhetoric and reality of ownership suggests that the un uses local ownership primarily as a discursive tool for legitimation one intended to reconcile conflicting normative and operational imperatives that it faces however because its actions do not match its rhetoric the un s attempts to generate legitimacy through discourse appear to fall flat particularly in the eyes of local actors and because of contradictions in the ways that the un operationalizes local ownership it also inhibits the achievement of its operational goals as well practical guide to understanding the dnp degree and to completing a successful capstone project clinical education and policy exemplars of successful dnp capstone projects illustrate the necessary components and approach provides guidance on publicizing results and conducting projects as a dnp this textbook focuses on enhancing understanding and characterizing the doctor of nursing practice degree and its place in the current healthcare environment the book offers guidelines for planning and conducting all phases of a dnp capstone project examples of successful projects from varied areas of nursing practice are included along with practical tips for publicizing capstone project results to the wider medical community in my 10 plus years of teaching i have found that students struggle with two major challenges in writing a quality capstone paper first they have difficulty creating a rigorous analytical framework too often the papers tend to be more descriptive in nature which means that the final policy recommendation may be flawed this book attempts to fill that gap by discussing in detail the various components of the framework as well as their interdependence second most public policy books are theoretical or conceptual but it is difficult for students to make the transition from understanding the concepts to performing the actual quantification of the metrics so necessary to do the analysis this book provides detailed instructions on how to do the quantification helix is the capstone research journal of ivy collegiate school

student researchers conduct annual research projects in an area of their choosing selected presentations and papers are published in this journal research topics vary greatly in approach and field topics range from questions in the life sciences to studies in musicology teaching critical thinking in psychology features current scholarship on effectively teaching critical thinking skills at all levels of psychology offers novel nontraditional approaches to teaching critical thinking including strategies tactics diversity issues service learning and the use of case studies provides new course delivery formats by which faculty can create online course materials to foster critical thinking within a diverse student audience places specific emphasis on how to both teach and assess critical thinking in the classroom as well as issues of wider program assessment discusses ways to use critical thinking in courses ranging from introductory level to upper level including statistics and research methods courses cognitive psychology and capstone offerings the importance of critical thinking has surged as academics in higher education realize that many students upon entering college lack the critical thinking skills necessary to succeed while much has been written regarding the lack of critical thinking less has been written on the success of methods implemented to develop this fundamental skill the handbook of research on advancing critical thinking in higher education explores the effective methods and tools being used to integrate the development of critical thinking skills in both undergraduate and graduate studies due to the difficulties associated with teaching critical thinking skills to learners of any age this publication is a crucial addition to the scholarly reference works available to pre service and early career teachers seasoned educational professionals professors across disciplines curriculum specialists and educational administrators the biomedical engineering senior capstone design course is probably the most important course taken by undergraduate biomedical engineering students it provides them with the opportunity to apply what they have learned in previous years develop their communication teamwork project management and design skills and learn about the product development process it prepares students for professional practice and serves as a preview of what it will be like to work as a biomedical engineer the capstone design experience can change the way engineering students think about technology themselves society and the world around them it can make them aware of their potential to make a positive contribution to healthcare throughout the world and generate excitement for and pride in the engineering profession ideas for how to organize structure and manage a senior capstone design course for biomedical and other engineering students are presented here these ideas will be helpful to faculty who are creating a new design course expanding a current design program or just looking for some ideas for improving an existing course the better we can make these courses the more industry ready our students will be and the better prepared they will be for meaningful successful careers in biomedical engineering this book is the second part of a series covering capstone design courses for biomedical engineers part i is available online here and in print isbn 9781598292923 and covers the following topics purpose goals and benefits designing a course to meet student needs enhancing the capstone design courses meeting the changing needs of future engineers table of contents the myth of the industry ready engineer recent trends and the current state of capstone design preparing students for capstone design helping students recognize the value of capstone design courses developing teamwork skills incorporating design controls learning to identify problems unmet needs and new product opportunities design verification and validation liability issues with assistive technology projects standards in capstone design courses and the engineering curriculum design transfer and design for manufacturability learning from other engineering disciplines capstone design conferences maintaining a relevant up to date capstone design course active learning in capstone design courses showcasing student projects national student design competitions managing student expectations of the real world career management and professional development conclusion the biomedical engineering senior capstone design course is probably the most important course taken by undergraduate biomedical engineering students it provides them with the opportunity to apply what they have learned in previous years develop their communication teamwork project management and design skills and learn about the product development process it prepares students for professional practice and serves as a preview of what it will be like to work as a biomedical engineer the capstone design experience can change the way engineering students think about technology themselves society and the world around recent years have seen an increasing emphasis on local ownership in united nations peacekeeping advocates assert that it boosts the legitimacy and sustainability of peacekeeping by helping to preserve the principles of self determination and non imposition in an activity that can contravene them however whether this assertion holds in practice has not been backed up by careful conceptual and empirical analysis this book fills this gap by mapping the discourse understandings and operationalization of local ownership in un peacekeeping both from the perspective of the un and local actors drawing on the case of the un peacekeeping operation in dr congo and a number of other cases it shows that despite its regular invocation of local ownership discourse the un operationalizes ownership in restrictive ways that are intended to protect the achievement of operational goals but which consequently limit self determination and increase external imposition on the host country this gap between the rhetoric and reality of ownership suggests that the un uses local ownership primarily as a discursive tool for legitimation one intended to reconcile conflicting normative and operational imperatives that it faces however because its actions do not match its rhetoric the un s attempts to generate legitimacy through discourse appear to fall flat particularly in the eyes of local actors and because of contradictions in the ways that the un operationalizes local ownership it also inhibits the achievement of its operational goals as well
