Works 1883

how history works assesses the social function of academic knowledge in the humanities exemplified by history and offers a critique of the validity of historical knowledge the book focusses on history s academic disciplinary ethos to offer a reconception of the discipline of history arguing that it is an existential liability if critical analysis reveals the sense that history offers to the world to be illusory what stops historical scholarship from becoming a disguise for pessimism or nihilism history is routinely invoked in all kinds of cultural political economic psychological situations to provide a reliable account or justification of what is happening moreover it addresses a world already receptive to comprehensive historical explanations since everyone has some knowledge of history everyone can be manipulated by it this book analyses the relationship between specialized knowledge and everyday experience taking phenomenology husserl and pragmatism james as methodological guides it is informed by a wide literature sceptical of the sense academic historical expertise produces and of the work history does represented by thinkers such as schopenhauer nietzsche valéry anders and cioran how history works discusses how history makes sense of the world even if what happens is senseless arguing that behind the smoke screen of historical scholarship looms a chaotic world dynamic indifferent to human existence it is valuable reading for anyone interested in historiography and historical theory

How History Works 2015-09-16

how science works provides student and practising teachers with a comprehensive introduction to one of the most dramatic changes to the secondary science curriculum underpinned by the latest research in the field it explores the emergence and meaning of how science works and reviews major developments in pedagogy and practice with chapters structured around three key themes why how science works what it is and how to teach it expert contributors explore issues including the need for curriculum change arguments for scientific literacy for all school students views about science what we understand about scientific methods types of scientific enquiry and importantly effective pedagogies and their implications for practice aiming to promote discussion and reflection on the ways forward for this new and emerging area of the school science curriculum it considers teaching controversial issues in science argumentation and questioning for effective teaching enhancing investigative science and developing reasoned scientific judgments the role of ict in exploring how science works teaching science outside the classroom how science works is a source of guidance for all student new and experienced teachers of secondary science interested in investigating how the curriculum can provide creativity and engagement for all school students

How Science Works 2010-12-02

drawing on a wealth of new evidence pioneering research psychologist david desteno shows why religious practices and rituals are so beneficial to those who follow them and to anyone regardless of their faith or lack thereof scientists are beginning to discover what believers have known for a long time the rewards that a religious life can provide for millennia people have turned to priests rabbis imams shamans and others to help them deal with issues of grief and loss birth and death morality and meaning in this absorbing work desteno reveals how numerous religious practices from around the world improve emotional and physical well being with empathy and rigor desteno chronicles religious rites and traditions from cradle to grave he explains how the japanese rituals surrounding childbirth help strengthen parental bonds with children he describes how the apache sunrise ceremony makes teenage girls better able to face the rigors of womanhood he shows how buddhist meditation reduces hostility and increases compassion he demonstrates how the jewish practice of sitting shiva comforts the bereaved and much more desteno details how belief itself enhances physical and mental health but you don t need to be religious to benefit from the trove of wisdom that religion has to offer many items in religion s toolbox can help the body and mind whether or not one believes how god works offers advice on how to incorporate many of these practices to help all of us live more meaningful successful and satisfying lives

How God Works 2021-09-14

The Poetical Works of Alice and Phoebe Cary 1882

hubris is something we ve all seen in action and experienced all too often it s a significant occupational hazard and a serious potential derailment factor for leaders organisations and civil society hubristic leaders intoxicated as they are with power praise and success behave in ways that if left unchecked invite unintended and unforeseen negative consequences which impact destructively on individuals industries economies and nations despite numerous examples throughout history of hubris destructive consequences it nonetheless appears to be an ever present and growing danger many leaders seem to be blind to the hazards of hubris and oblivious to the lessons of history prevention is better than cure and understanding the nature of the hubris hazard and the associated risk factors will help leaders and managers improve their personal performance and avoid derailment and even more importantly protect the well being of employees and the resilience of their organisations over the long term this book explains the characteristics causes and consequences of hubris and shows how to combat the significant hazard it poses to managers leaders organisations and society with contemporary examples each chapter explores a particular hubris risk factor and shows how the risk can be managed and mitigated and exposure to the hubris hazard minimised the hubris hazard and how to avoid it offers practical guidance and action points for managers and leaders on how to recognise hubris in themselves and others and what to do to combat it when it arises it will also be useful for business and executive coaches and leadership trainers and developers

The Works of Charles Dickens 1897

the bestselling author and therapist describes how electing high conflict personalities from hitler and mao to putin and trump threatens democracy democracy is under siege the reason isn t politics but personalities too many countries have come under the sway of high conflict people hcps who have become politicians most of these high conflict politicians have traits of narcissistic personality disorder antisocial i e sociopathic personality disorder or both this is the first and only guide for identifying and thwarting them hcps don t avoid conflict they thrive on it widening social divisions and exacerbating international tensions eddy the world s leading authority on high conflict personalities explains why they re so seductive and describes the telltale traits that define hcps he even includes a helpful list of forty typical hcp behaviors drawing on historical examples from hitler stalin mao and nixon to trump maduro and putin eddy shows how hcps invent enemies and manufacture phony crises so they can portray themselves as the sole heroic figure who can deal with them despite their inability to actually solve problems he describes the best ways to expose hcps as the charlatans they are reply to their empty and misleading promises and find genuine leaders to support eddy brings his deep psychotherapeutic experience to bear on a previously unidentified phenomena that presents a real threat to the world eddy details a prescriptive strategic action formula for preventing the predictable destructive outcomes of authoritarian leaders this book will alarm you inform you and shake up your perspective propelling you to take action but only reasonable and effective action donald t saposnek phd author of mediating child custody disputes

The complete poetical works 1869

this book has two purposes first to introduce the study of work and the workplace as a method for informing the design of computer systems to be used at work we primarily focus on the predominant way in which the organization of work has been approached within the field of human computer interaction hci which is from the perspective of ethnomethodology we locate studies of work in hci within its intellectual antecedents and describe paradigmatic examples and case studies second we hope to provide those who are intending to conduct the type of fieldwork that studies of work and the workplace draw off with suggestions as to how they can go about their own work of developing observations about the settings they encounter these suggestions take the form of a set of maxims that we have found useful while conducting the studies we have been involved in we draw from our own fieldwork notes in order to illustrate these maxims in addition we also offer some homilies about how to make observations again these are ones we have found useful in our own work table of contents motivation overview a paradigmatic case scientific foundations detailed description case study how to conduct ethnomethodological studies of work making observations current status

The Complete Works of Menno Simons 1871

there is no end of talk and of wondering about art and the arts this book examines a number of questions about the arts broadly defined to include all of the arts some of these questions come from philosophy examples include what makes something art can anything be art do we experience real emotions from the arts why do we seek out and even cherish sorrow and fear from art when we go out of our way to avoid these very emotions in real life how do we decide what is good art do aesthetic judgments have any objective truth value why do we devalue fakes even if we indeed even the experts can t tell them apart from originals does fiction enhance our empathy and understanding of others is art making therapeutic others are common sense questions that laypersons wonder about examples include does learning to play music raise a child s iq is modern art something my kid could do is talent a matter of nature or nurture this book examines puzzles about the arts wherever their provenance as long as there is empirical research using the methods of social science interviews experimentation data collection statistical analysis that can shed light on these questions the examined research reveals how ordinary people think about these questions and why they think the way they do an inquiry referred to as intuitive aesthetics the book shows how psychological research on the arts has shed light on and often offered surprising answers to such questions

Violin Master Works and Their Interpretation 1979

we use software every day to perform all kinds of magical powerful tasks it s the force behind stunning cgi graphics safe online shopping and speedy google searches software drives the modern world but its inner workings remain a mystery to many how software works explains how computers perform common yet amazing tasks that we take for granted every day inside you ll learn how data is encrypted how passwords are used and protected how computer graphics are created how video is compressed for streaming and storage how data is searched and found in huge databases how programs can work together on the same problem without conflict how data travels over the internet how software works breaks down these processes with patient explanations and intuitive diagrams so that anyone can understand no technical background is required and you won t be reading through any code in plain english you ll examine the intricate logic behind the technologies you constantly use but never understood if you ve ever wondered what really goes on behind your computer screen how software works will give you fascinating look into the software all around you

What is the Power of the Greek Article, and how May it be Expressed in the English Version of the New Testament?. 1842

drawing on 40 years of research and patient care dr wayne jonas explains how 80 percent of healing occurs organically and how to activate the healing process in how healing works dr wayne jonas lays out a revolutionary new way to approach injury illness and wellness dr jonas explains the biology of healing and the science behind the discovery that 80 percent of healing can be attributed to the mind body connection and other naturally occurring processes jonas details how the healing process works and what we can do to facilitate our own innate ability to heal dr jonas s advice will change how we consume health care enabling us to be more in control of our recovery and lasting wellness simple line illustrations communicate statistics and take aways in a memorable way stories from dr jonas s practice and studies further illustrate his method for helping people get well and stay well after minor and major medical events

Studies of Work and the Workplace in HCI 2009-08-08

cities are raucous cacophonous and complex many dimensions of life play out and conflict across cities intricate landscapes be they political cultural economic or social urban policy makers and analysts often attempt to cut through the noise of urban disagreement by emphasizing a dominant lens for understanding the key central logic of the city how to think about cities sees this tendency to selective vision as misleading and ultimately unjust cities are many things at once to different people and communities this book describes the various ways of seeing the functions and landscapes of the city as place frames and the constant process of negotiating which place frames best explain the city as place making martin and pierce call for an explicitly hybrid perspective that shifts between many different frames for making sense of cities this approach highlights how any given stance opens up some lines of inquiry and understanding while closing off others thinking of cities as sites of contested perspectives promotes a synthetic approach to urban analysis that emphasizes difference and political possibility this mosaic view of the city will be a welcome read for those within urban studies geography and social sciences exploring the many faces of urban life

The Punjab Record 1878

this volume explores higher level critical and creative thinking as well as reflective decision making and problem solving what teachers should emphasize when teaching literacy across the curriculum focusing on how to encourage learners to become independent thinking learning and communicating participants in home school and community environments this book is concerned with integrated learning in a curriculum of inclusion it emphasizes how to provide a curriculum for students where they are socially interactive personally reflective and academically informed contributors are authorities on such topics as cognition and learning classroom climates knowledge bases of the curriculum the use of technology strategic reading and learning imagery and analogy as a source of creative thinking the nature of motivation the affective domain in learning cognitive apprenticeships conceptual development across the disciplines thinking through the use of literature the impact of the media on thinking the nature of the new classroom developing the ability to read words the bilingual multicultural learner crosscultural literacy and reaching the special learner the applications of higher level thought to classroom contexts and materials are provided so that experienced teacher educators and psychologists are able to implement some of the abstractions that are frequently dealt with in texts on cognition theoretical constructs are grounded in educational experience giving the volume a practical dimension finally appropriate concerns regarding the new media hypertext bilingualism and multiculturalism as they reflect variation in cognitive experience within the contexts of learning are presented
