the world is drifting without a clear plan for its economic development communism is dead but in the wake of enron and similar scandals many see capitalism as amoral and too easily abused a blueprint for progress is needed and moral capitalism provides one moral capitalism is based on principles developed by the caux round table an extraordinary international network of top business executives who believe that business can and must weigh both profit and principle caux round table s global chair stephen young argues that the ethical standards inherent in capitalism have been compromised by cultural values inimical to capitalism s essentially egalitarian rational spirit and distorted by the short sighted dog eat dog doctrines of social darwinism into what he calls brute capitalism he demonstrates how the caux round table s seven general principles for business can serve as a blueprint for a new moral capitalism and explores in detail how if guided by these principles capitalism is really the only system with the potential to reduce global poverty and tyranny and address the needs and aspirations of individuals societies and nations

capitalism is the dominant economic framework in modern history but it's unclear how it really works relying on the free movement and spontaneous coordination of seemingly infinitesimal market forces its very essence is remarkably complex geoffrey m hodgson offers a more precise conceptual framework defines the concepts involved and illustrates that what is most important and what has been most often overlooked are institutions and contracts the law chapter by chapter hodgson focuses in on how capitalism works at its very core to develop his own definitive theory of capitalism by employing economic history and comparative analysis toward explanatory and analytical ends hodgson shows how capitalism is not an eternal or natural order but indeed a relatively recent institution if anyone were qualified to venture such a comprehensive and definitive analysis of such an important economic legal and social phenomenon it is geoffrey hodgson conceptualizing capitalism will significantly alter and carry forward our understanding of markets and how they work

what and who are we working for a thoughtful assessment on our current society from probably america's most prominent marxist economist the new york times capitalism as a system has spawned deepening economic crisis alongside its bought and paid for political establishment neither serves the needs of our society whether it is secure well paid and meaningful jobs or a sustainable relationship with the natural environment that we depend on our society is not delivering the results people need and deserve one key cause for this intolerable state of affairs is the lack of genuine democracy in our economy as well as in our politics the solution requires the institution of genuine economic democracy starting with workers managing their own workplaces as the basis for a genuine political democracy here richard d wolff lays out a hopeful and concrete vision of how to make that possible addressing the many people who have concluded economic inequality and politics as usual can no longer be tolerated and are looking for a concrete program of action wolff's constructive and innovative ideas suggest new and promising foundations for much more authentic democracy and sustainable and equitable development ideas that can be implemented directly and carried forward a very valuable contribution in troubled times noam chomsky leading public intellectual and author of hope and prospects
